

Be Sure With SHURLOK™ Bearings

Install, remove, and replace the new SHURLOK™ Adapter Mounted Roller Bearing quickly and easily. The Spyglass™ Optical Strain Sensor change color when the assembly is properly tightened, so you can be confident that it's installed right the first time, every time.

Spyglass™ optical strain sensor ensures quick and easy installation

Self-aligning spherical roller bearings allow for three degrees of static and dynamic misalignment

Optical auxiliary end caps and three interchangeable field options ensures longer bearing life

Rugged one-piece housing helps reduce installation and removal time by 80%, versus SAF-style roller bearings

Tapered adapter sleeve - allows for easy installation and removal, and the use of commercial grade shafts

Positive locking system - reduces vibration and eliminates the need for routine mounting inspections
