

Android - auto-populate the mobile number

**Mobile Number Format**  
 Utilize the device's LOCALE, LANGUAGE and CARRIER information to determine the country code and language to be used.

Also, the user may enter the mobile number in the format they are most used to entering. For example:  
 1. US: 4045551212 or 14085551212 or +14085551212  
 2. UK: 0775712345 or +44775712345 or 775712345  
 (this 0 prefix is used in most European countries (and South Africa))

**Birthday Format**  
 Display birthday format according to the country's preference.

**Auto Scroll Page**  
 When the user taps on the birthday field, the screen automatically scrolls up so that the "sign up" button is above the keyboard.
