# Stori

**“Stori” offers a super flexible and playful storage space, initially designed for child rooms, and their need for easy storage of toys, games, but also any other object that requires “bulky” spaces. It is further a furniture that is built to last, both functionally and aesthetically.**

**The storage boxes are made in semisoft recycled PET felt. Relatively cheap, very durable and available in a wide range of colors.**

**The wooden shelf system is made of precision formed wood veneer. The supporting pole in the back is also wood.**

**The system is modular and well suited for extensions.**

**Anders Lilleby**

**Industrial designer/CEO at  
Lilleby Form**
