

ULI Student Competition

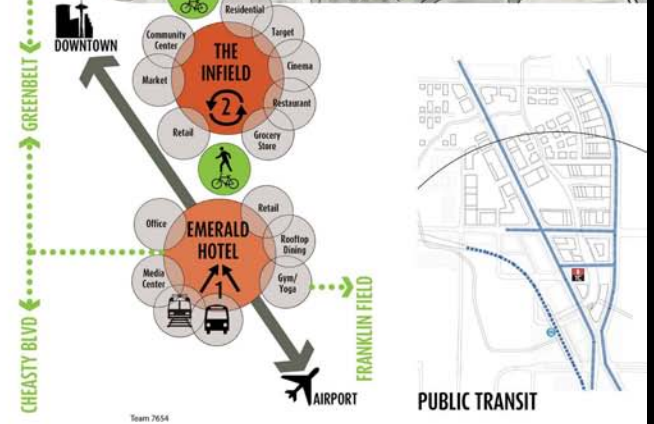

Team 7654

SPANNING THE VALLEY

Re-linking the physical, cultural, economic, and historic gaps of the North Rainier Valley

Team 7654

PROJECT INFORMATION

Project Year: 2011
Location: Mt. Baker Area, Seattle, WA
Team: Bo Jiang, Chad Butterworth, Maggie Watts, Caitlin Smolewski, Michael Skena

PROJECT SUMMARY

The requirement of this competition is to evaluate the weaknesses and strengths of the existing elements both in and around our site, trace back in history to find out the values people once appreciated and awaken them. By incorporating principles from both landscape architectural and architectural, we are trying to rearrange all the existing opportunities and redefine those good historical values under contemporary status quos, so as to provide a better living condition, and reactivate a more wonderful and healthy city life for the people living in Mt. Baker area.
