

Commercial and Residential Low Voltage Specialty Electrical Services and Solutions.

A one-stop-shop for all your low voltage needs. On that premise, TECH, inc. was established in 1992. Since then, we have provided an expansive range of highest quality services for a wide range of customers including; the Smithsonian Institute's Cultural Resource Center, the Verio Data Server Center, the IRS National Headquarters, the Census Bureau Headquarters, the new Washington D.C. Convention Center and many others. Our skilled and experienced engineers and technicians offer an outstanding single source solution for complete design, installation, monitoring and maintenance packages -- in virtually all communications system areas. Count on us for the finest integrated systems and a two-part process that covers everything: First, our engineering and technical skills identify and address your critical systems requirements; Second, we provide those solutions that will best meet your specific needs.

COMMUNICATIONS WIRING INFRASTRUCTURE SYSTEMS

TECH, inc. provides solutions to meet all your bandwidth requirements far into the future. Whether in your home, office, data center or campus, our BiCSi-certified Registered Communications Distribution Designers (RCDD) will ensure that your cabling infrastructure needs for voice, data and video are met with the most efficient, effective solutions -- all tested, documented and delivered according to strictest BiCSi, TIA/EIA and NFPA standards.

INTEGRATED SECURITY SYSTEMS

In today's residential, commercial and government sectors, security is one of the most critical challenges. TECH, inc. overcomes these challenges by offering state-of-the-art integrated security systems and services. The process starts with a complete analysis of your requirements. Then, we can design, install and maintain the most appropriate and sophisticated systems including access control, command and control, alarm and digital surveillance, intrusion detection and closed-circuit television (CCTV).

SOUND AND VIDEO SYSTEMS

TECH, inc. offers complete design and installation services for audio visual systems. We provide a wide range of A/V services from home theater installation to highly technical professional sports stadium requirements. Our design staff includes dedicated A/V engineers with special skills and experience in applications including distributed audio, theater, boardroom/conference room capabilities and MATV and public address systems.

Excellence in Design and Engineering

Our staff offers a comprehensive range of engineering and technical skills -- all to help identify and address your critical system requirements. And we use only the finest and best-suited products and components. In every case, TECH, inc incorporates the most current technical and cost-effective innovations.

WE MANAGE AND WE DELIVER

Successful completion of any project calls for meticulous time management and logistics. That's why TECH, inc. provides total life cycle management on every project. The latest computer-based scheduling and document management tools, along with a dedicated project manager, ensure that each project is completed on time and within budget.

Even when your project is complete, TECH, inc. will continue to deliver. Our highly trained service fleet is ready to answer your call for MAC (moves, adds and changes) work, maintenance contracts, office relocations or any other support you may need.

TECH, inc prides itself on excellence in project delivery. Our well-trained workforce, combined with extensive bonding and buying power, facilitates timely project delivery. We believe that a system is only as good as the performance that results from it's installation. We are committed every step of the way, to deliver on that belief.

YOUR SATISFACTION IS OUR COMMITMENT

Our goal is always 100% customer satisfaction. We work toward this goal by offering a highly trained professional staff along with teams of experienced support personnel. We are committed to total customer satisfaction and will answer your call 24 hours a day, 365 days a year.
