

**COMPLEX FACILITY.
YOUR RESPONSIBILITY.
RELAX. YOU HAVE *reliatech*.**

reliatech delivers the support you need to ensure the reliability of your complex facilities and systems..

reliatech provides precision engineering and technical expertise for industrial, commercial, and government facilities around the world. Our comprehensive processes cover commissioning, facility services, and project management – and our scalable arrangement gives you total flexibility.

We help you simplify – providing an easy process, a customized arrangement, and professional delivery of engineering services.

The Owner's Advocate

reliatech specialists prevent costly system failures and project delays, provide value-added quality construction, and minimize the effects of design changes. We also help clients move ahead with green initiatives – enhancing the health, productivity, and comfort of employees and tenants.

Our teams work to reduce change orders and increase efficiencies. We are the owner's advocate for design and construction decisions – ensuring high performance, stripping away excess costs.

Mechanical. Electrical. Technical. We support every system.

reliatech supports facilities where operational integrity and security are crucial – from mission-critical and LEED® projects to Class A office buildings and high-security structures worldwide. Clients appreciate knowing we have the multidisciplinary capabilities, certifications, and clearances to handle every challenge.

reliatech is the owner's advocate for design and construction decisions – ensuring high performance, stripping away excess costs.

SERVICES

COMMISSIONING

Our specialists provide engineering and technical services to ensure that buildings perform according to the owner's requirements – with energy efficiency and reliability. Clients benefit from our expertise with facilities requiring sophisticated integration of mechanical, electrical, high security, and uninterruptible power systems.

reliatech is certified and experienced in the latest commissioning methods, so we can help you fulfill every specification – especially those that require a comprehensive approach.

PROJECT MANAGEMENT

We speed progress and reduce risks by ensuring smooth coordination between design and construction. Our Project Managers use innovative technology to provide accurate schedules, cost control and life-cycle costing. We seamlessly integrate all elements, from planning and administration to value engineering and quality control.

BUILT-IN RELIABILITY

We offer reliability-centered maintenance (RCM), energy monitoring, design engineering, creation of operating procedures, custom services, and more. Our managers forecast system failure scenarios in order to optimize reliability. Your systems will function optimally when our technicians provide the support.

Ready to build with confidence?
You're ready for *reliatech*.
Let us engineer your facility's success.
