

HIGH OPERATING COSTS
YOUR RESPONSIBILITY?
RELAX. YOU HAVE *reliatech*.

reliatech is the owner's advocate for design and construction decisions
- ensuring energy efficiency & sustainable design.

reliatech offers the full range of design and commissioning services.
reliatech would be pleased to assist with any of the following:

- New design
- Modifications/Renovations
- Energy Conservation Projects
- LEED Building Support
- Commissioning, recommissioning, retro-commissioning
- Calculations and Studies
- Troubleshooting
- Critical Power Projects
- BAS upgrades

Do you need immediate engineering services?

1. To resolve permitting issues
2. To provide technical inspections and analysis
3. To provide assistance in evaluating equipment
4. To perform Code reviews
5. To help troubleshoot problems

reliatech can provide full Mechanical, Electrical, and Plumbing design and consulting engineering services in house. In partnership with other professionals, Architecture, Fire Protection, and Civil/Structural design and consulting engineering services can also be provided.

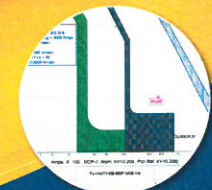

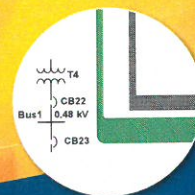

We can typically provide drafted and sealed design drawings and/or calculations as necessary for small projects within 3 business days (plus shipping time) or less. For studies and analyses, the schedule will be provided with 24 hours of request for *reliatech* services.

Professional services requiring a local engineer's seal are available for projects in Maryland, Virginia, and the District of Columbia. Other jurisdictions are available by special request.
