## Potting

Potting the Butterfly orchid in regular potting soil will most likely kill it. Instead, they recommend a potting mix of, bark, crushed charcoal, lava stones, sphagnum moss, or some combination of the above in order to give the orchid the conditions that it needs to grow healthy and hearty. Fertilize your plant two to three times a week.

## Watering

The watering needs of the Butterfly Orchid is similar to that of the other orchids. Make sure you have a well drained flower pot. The butterfly orchids doesn't like their feet wet. Make sure you empty the tray after each watering.
