

Nesting Chess Set

This chess set was an exercise in hierarchy and form. The hierarchy was developed with increasing volumes and the pieces were handmade from Cherry hardwood. Not only are the pieces easy to identify but they also fit together into a finger jointed walnut box. This creates an added puzzle element. The eternal struggle between good/bad, light/dark, yin/yang is apparent in this set.

Magnetic closure creates a minimal look

Hierarchy is based on one cubic inch
