The Carl
and Edyth
Lindner
Center
for Research and Education

The Carl and Edyth Lindner Center for Research and Education has a reputation for building the future for cardiovascular care and treatment protocols. With over 1,200 clinical trials and almost 1,000 journal articles, abstracts and book chapters—The Lindner Research Center's leading-edge expertise and innovation is redefining healthcare for cardiovascular patients.

And, once again, we've been selected to offer pioneering clinical research for heart patients who are ineligible for traditional valve surgery. For these patients, the PARNTER II transcatheter aortic valve replacement clinical trial offers a minimally invasive option.
