

Naeem Trading Company

Profile

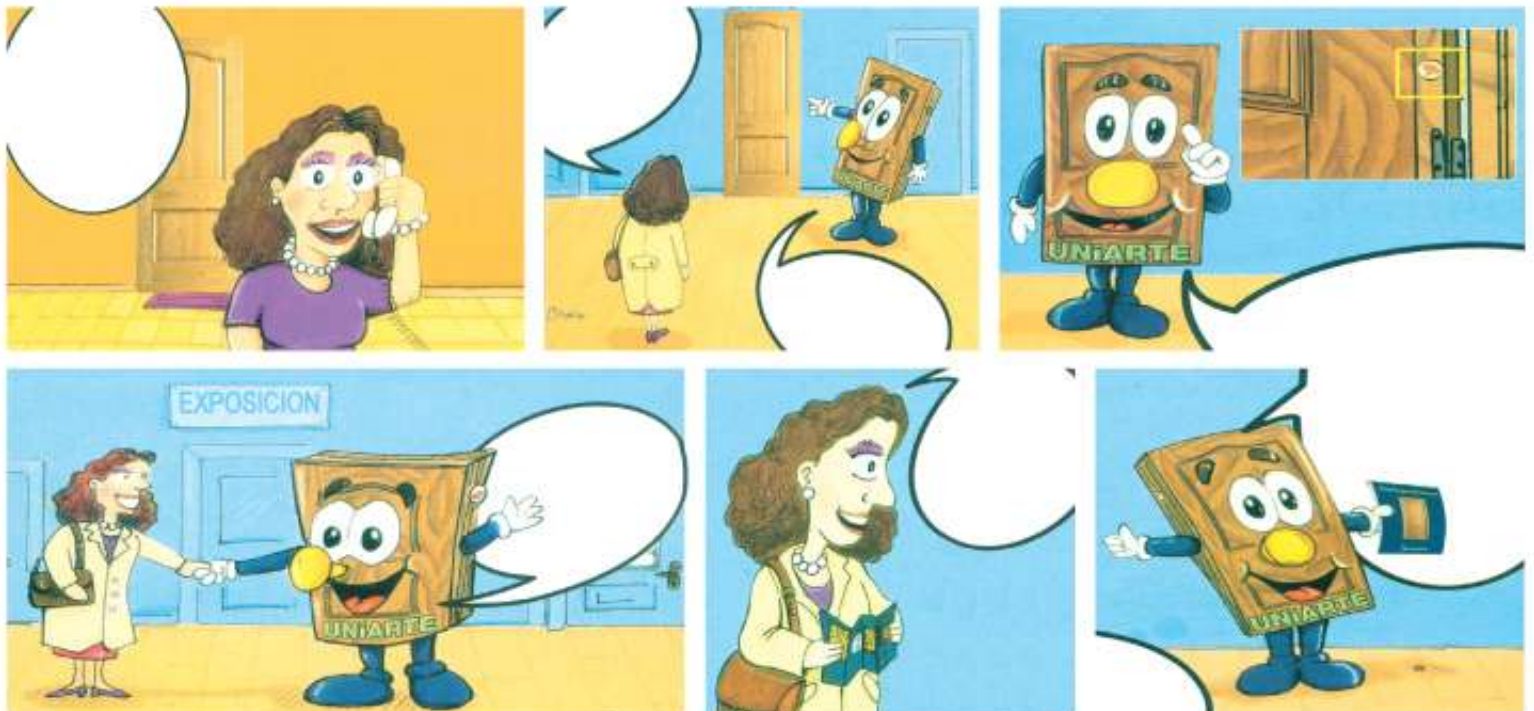

Naeem Trading Company; abbreviated as NTC was founded by Mr. Naeem Anwer in 1977 as wholesalers of Plywood and other construction related intermediary wood products.

NTC has recently launched Complete Kitchen Solutions and within a short span of time the company has successfully been able to influence the market. Keeping in mind quality along with economy, the move is only towards further improvement.

Ever since, it has been a journey only towards higher quality and better customer service which has allowed the company to build a reputation and develop a name that is trusted the market.

One of the prime reasons of NTC's success has been the Foresight of the founder and the ability to predict Future Trends. Hence, NTC is able to supply products in the market which were much ahead of time.

Today, the company has been able to serve the end consumer by providing almost all wooden products required for residential and commercial construction.

72 + 36 In (One Set)	24 In	22 mm

NOTE:

Doors application:

Suitable for use as Entrance, Internal, Side Lite, Sliding, Bifolds and Wardrobe. Not recommended as External use that has direct exposure to sun and rain.

Important Hints To Prolong Life Of Your Door:

- ⚠ Doors need to be sealed on all faces and edges with appropriate protective coating. Do not remove the plastic wrapping or other packing from the door until immediately use.
- ⚠ Doors should be stored flat (never on edge or on End) on a level surface and kept clear of the floor on at three level bearers. The bearers should be longer than the width of the doors.
- ⚠ Exposure to ultra violet light can cause fading or discolouration of timber veneers on door face. Thus it is recommended to store the doors at the shaded area.
- ⚠ Ensure that the moisture content of the wood is kept close to the level to which it was when the door was manufactured.
- ⚠ Internal doors must be conditioned to the service conditions before fixing. They must be protected from abnormal heat, extreme dryness, humid condition or sudden changes of temperature or humidity.
- ⚠ It is important that all surfaces of doors are painted. Treat the end grain and ensure that a good treatment is applied to all surfaces. Pay close attention to top and bottom edges; cut areas for lock and hinge housings and holes for letter plates.
