

Don't risk your nest egg!

Nursing home, skilled assisted living, in-home care, no matter what name you use, the cost of caring for our spouses, or ourselves, is costly. Spending \$5,000, \$6,000 or even \$7,000/month for care today is common.

The average nursing home stay is approximately 4 years. Those 4 years can cost you \$335,000 or more.

Why risk the nest egg you have worked your entire life to secure? A long-term care insurance plan will pay you a daily benefit amount to cover the costs of a nursing home or in-home care (other types of care covered too).

A long-term care plan protects more than just your nest egg. It can protect the comfortable standard of living that you, and your entire family, have become accustomed to.

Act now to protect your family and give yourself peace of mind. TDIC Insurance Solutions will find the right solution to match your needs.
