

# Problem Identification & Inspiration

Between 1-2% of the global population make a living through recycling landfill.

# The Product

The aim of the product is to teach new skills, and encourage development and adaptation by the individual to support themselves away from the landfill site. It aims to utilise materials that are available in abundance, as well as decreasing a negative environmental impact.

500 billion plastic carrier bags are used worldwide each year but only one in 200 bags are recycled.
