

ACE Homes is the real estate division of ACE Corporation, a civil engineering and contracting company started as a family concern by Mathew Joseph and Jessy Mathew, both being Civil Engineers with considerable experience in working with Engineering firms of repute in India and abroad.

ACE Homes has also announced ACE Amrutha Retreat at Edappally, close to the rejuvenating, most modern Institute of Amrutha Medical College. This is another location which we believe, will bring in great returns, both in rentals and value. Once the railway bridge is commissioned, it will be just 10 minutes off Edappally Bypass Junction. This is planned as twin towers, one having 2 bedroom apartments and the other having 3 bedroom ones, both with all the latest requirements and luxuries of modern life. Destined to be the medical capital of Kerala and with the influx of a huge medical tourism in to the State, this is one location and one project that can be looked seriously to, whether it is as a wonderful home offering an enjoyable, active life, or as a tranquil home for a retired life or even as an investment.

Well-experienced in the Contracting field, ACE Corporation has the complete infrastructure to create any building or structure of any nature within the scheduled time. Everything is built with internal resources – we have our own piling rigs, D.G., scaffolding and all related equipment of our own apart from a well established and strong Engineering staff and associates with good network of suppliers and labour force. From the foundation to the completion, we are not dependent on any Contractor or any other agency. Every one associated with us testifies to our capacity for planning and delivering supreme quality homes and civil engineering structures of every size and dimension.

Ace Amrutha Retreat is a prestigious project from Ace Contracting and Engineering Corporation - an organization promoted by professional Civil Engineers. In the last 18 years of operation, ACE Homes, a real estate division of ACE Corporation has gained a lot of trust and made solid relations all over. We have created landmark structures of different sizes and shapes, - from tall multi-storied buildings to bridges and communication towers, using a wide range of construction solutions including foundations in deep piles, ordinary compaction piles etc., all under one roof.

At ACE Homes, we pursue each project, ignited by the ardour to build. This has resulted in the blossoming of a beautiful dream, a dream which will be fulfilled in the scheduled time, bringing happiness and contentment to our small world of ACE Customers and Associates. Ace Amrutha Retreat is the result of this dream. Rest assured - the minute you place your trusting hand in ours, your dreams have reached a safe haven, - a serene retreat where you will always feel relaxed and at home.

True to our expertise in construction, Ace Amrutha Retreat has been done under our brand. It is supported by an already established system of perfection, without any external contracting or support.

Ace Amrutha Retreat is fully featured with all modern facilities like swimming pool, club house, health club, Jacuzzi, coffee shop, jogging track (see facilities) etc. It is at a convenient location, very close to the city, and close to NH 47, NH 17 and the new proposed container road and the ring road, yet silent and tranquil, near the ever rejuvenating wonder space of Amrutha institutions.

Meticulously planned, keeping in mind the high rental values available here, we opted for a twin tower, both with all facilities but kept separate, giving complete privacy and absolute peace to each occupant. The ground floor reception is equipped with intercom and camera at the lobby in addition to the security at the gate ensuring an absolutely safe and comfortable haven for all who become a part of Ace Amrutha Retreat.
