About us

ACE Homes is the real estate division of ACE Corporation, a civil engineering and contracting company started as a family concern by Mathew Joseph and Jessy Mathew, both being Civil Engineers with considerable experience in working with Engineering firms of repute in India and abroad.

Well-experienced in the Contracting field, ACE Corporation has the complete infrastructure to create any building or structure of any nature within the scheduled time. Everything is built with internal resources – we have our own piling rigs, D.G., scaffoldings and all related equipment of our own apart from a well established and strong Engineering staff and associates with good network of suppliers and labour force. From the foundation to the completion, we are not dependent on any Contractor or any other agency. Every one associated with us testifies to our capacity for planning and delivering supreme quality homes and civil engineering structures of every size and dimension.

ACE Nimbus Villas at Kaloor, which is completely sold out is a testimony to the "Quality-Quantity-Time" philosophy we preach. ACE Nimbus Apartments is now in progress in the same colony, hardly 500m from Kaloor, close to the East end of the North Railway Station. It has all modern living conditions, yet at the same time is very peaceful and tranquil. On announcement itself, more than 50% of the 7 storied building with 22 flats was sold out, mostly to our existing customers.

ACE Homes has also announced ACE Amrutha Retreat at Edappally, close to the rejuvenating, most modern Institute of Amrutha Medical College. This is another location which we believe, will bring in great returns, both in rentals and value. Once the railway bridge is commissioned, it will be just 10 minutes off Edappally Bypass Junction. This is planned as twin towers, one having 2 bedroom apartments and the other having 3 bedroom ones, both with all the latest requirements and luxuries of modern life. Destined to be the medical capital of Kerala and with the influx of a huge medical tourism in to the State, this is one location and one project that can be looked seriously to, whether it is as a wonderful home offering an enjoyable, active life, or as a tranquil home for a retired life or even as an investment.

ACE Citi Homes is at SRM Road, just 800m off North Railway Station. There are only 2 villas and a few small 2 bedroom apartments here available for sale. To live in the city and for daily city related activities, this is going to be another small gated community, everyone would love to be a part of.
