

HEXASRF

Installation Art - Parahyangan University

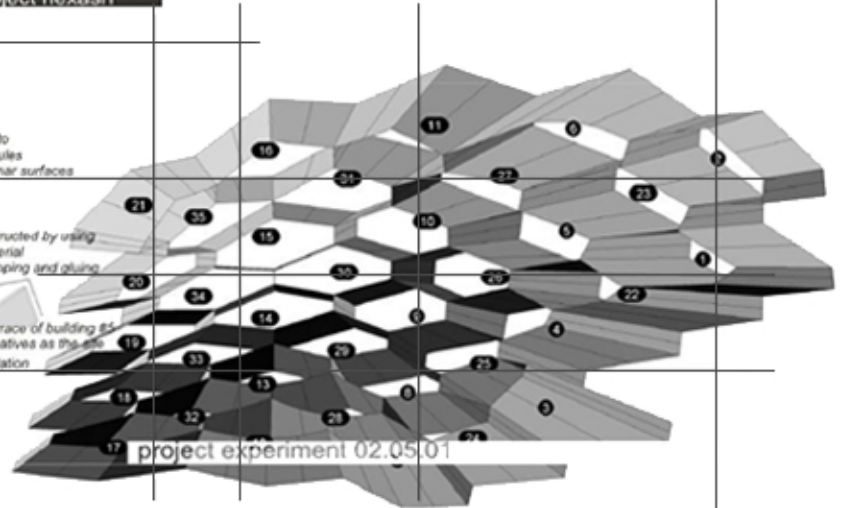

Installation project hexaSrf

hexaSrf is divided into 35 modules. Each modules consist of 4 custom planar surfaces

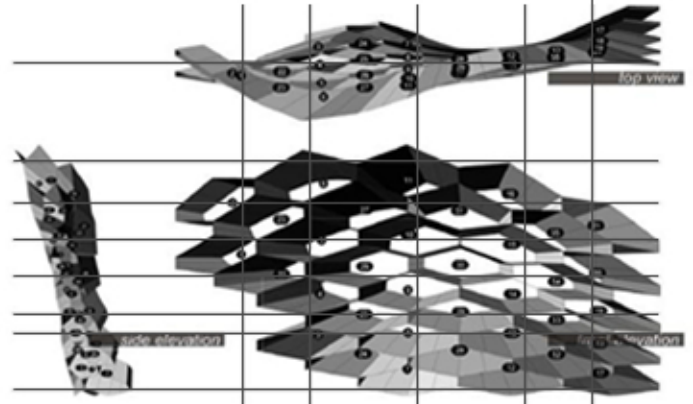

hexaSrf will be constructed by using cardboard as main material and combined its by clipping and gluing technic.

at the moment, front terrace of building 85 is one of the best alternatives as the site of the *hexaSrf* installation

modules

hexaSrf is divided into 35 modules. Each modules consist of 4 custom planar surfaces
