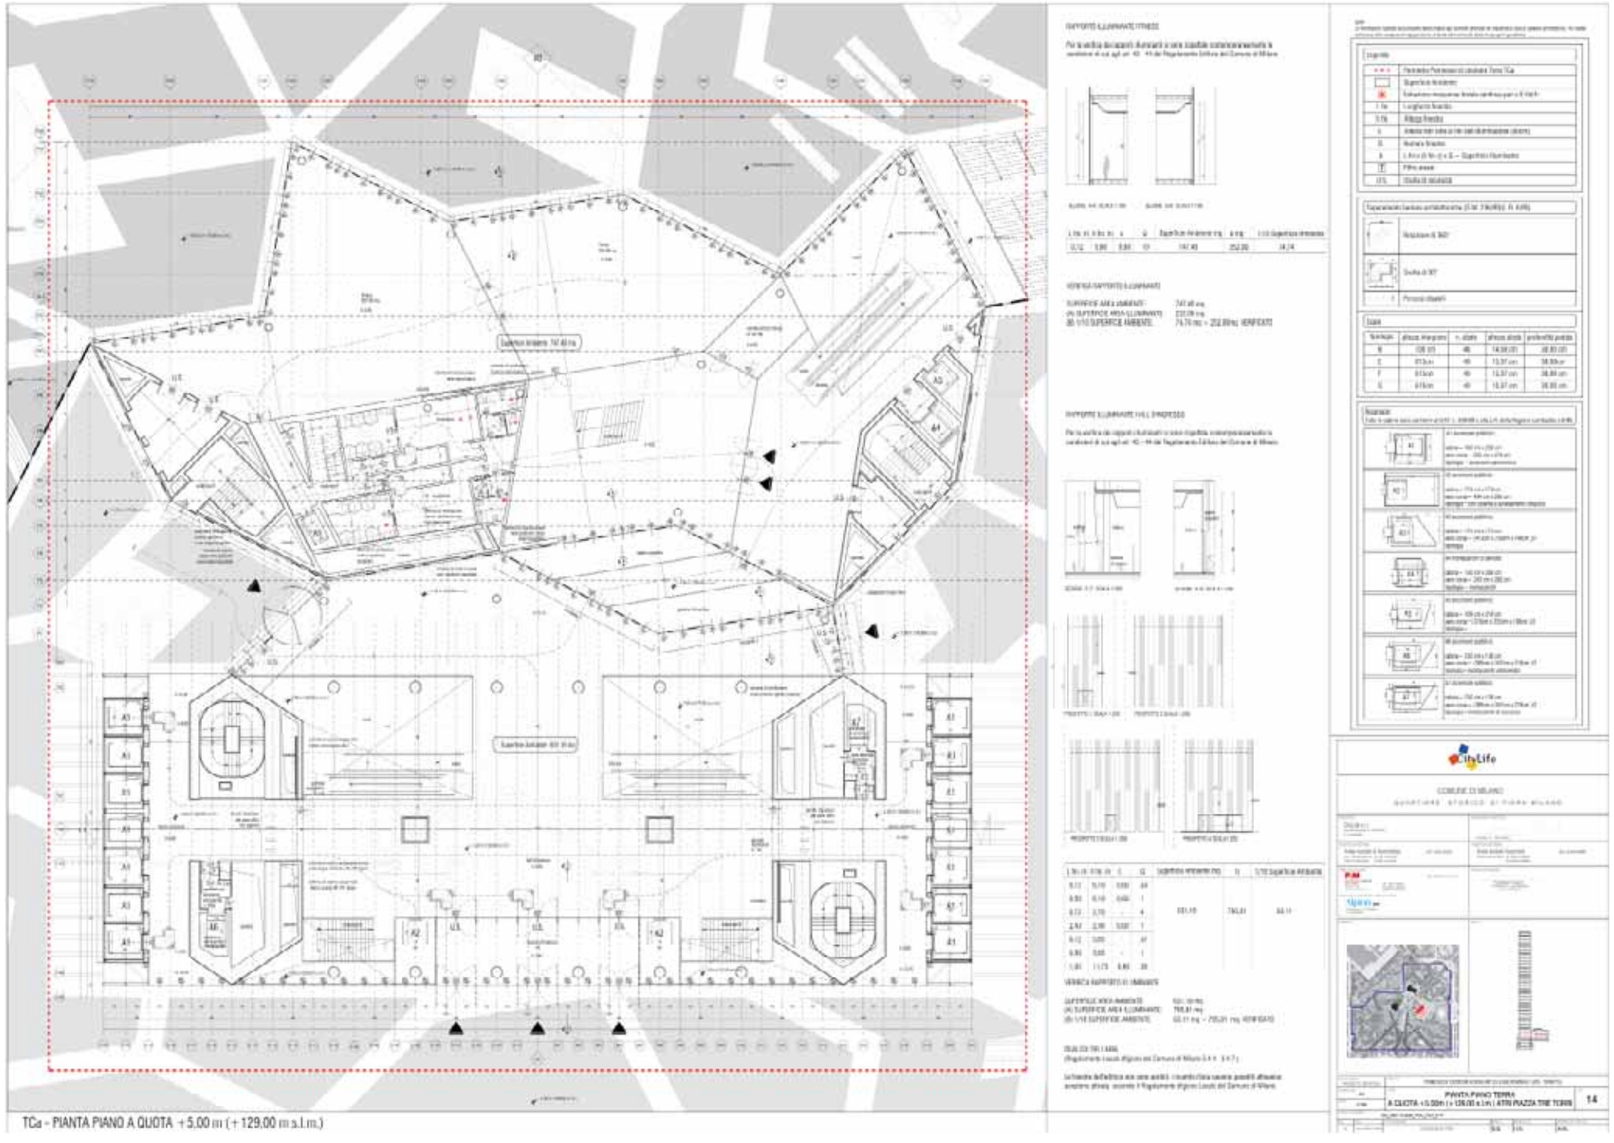
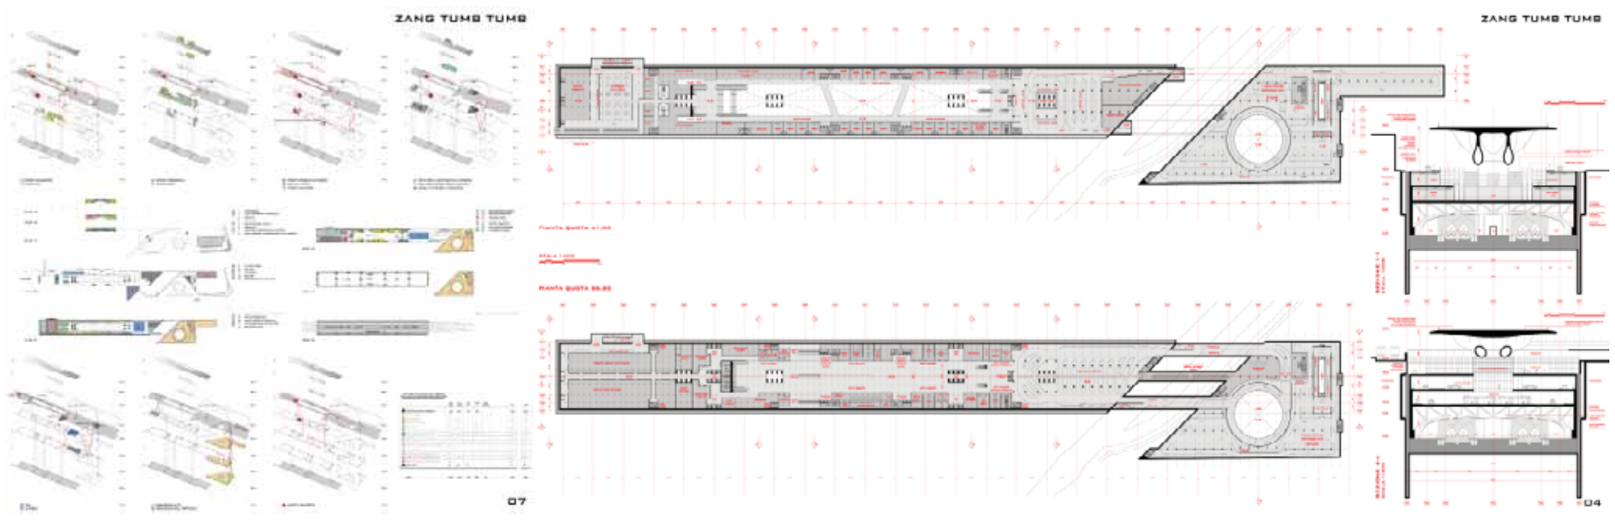
ISOZAKI ASSOCIATES




During my stay at Isozaki Associates I worked mainly on three projects: the Tower for offices and housing projects of CityLife in milan and the Public Library of Maranello.
As far as the tower is concerned I worked on some of its floors, and more specifically, the ground, the building systems and the top floors hosting a panoramic restaurant and the roof. I also worked on some renders.
As far as the housing project of CityLife and the Public Library of Maranello my task was mainly to elaborate and make renders and graphics.
