

Concept Statment

Mr. and Mrs. Kusch wanted to renovate their small home into something more accommodating for their needs. The couple loved the location of their home but it was not functional for their lifestyle. They have two young children and desire a space they can grow into. They wanted a single story home with an open floor plan, an additional master suite, additional bathroom, separate laundry, access to garage, and lots of storage. Master Suite separate from children's bedrooms and children's bedrooms facing away from street and noise. They family loves to entertain and prefer a great room with an open space leading into dining area and kitchen. The couple described their style as Modern with a mix of Traditional with an inviting and soft color palette. Over-all the family wanted a peaceful and less formal home, that allows them to relax and watch their children grow.
