

## A compact space that transforms

A 400 square foot space that, despite its compact size, provides the flexibility needed for a comfortable and functional living space. A multi-tasking partition wall slides along a track recessed in the floor, allowing the interior to be adapted to suit a variety of functions, including a home office space, a guest bedroom with a queen-sized bed, and living and dining areas suitable for entertaining. Exterior views are enjoyable from each spatial configuration, no matter which way the wall rolls.
