Scooters are BIG and clunky. Can it be brought into the COMPACT 21st Century?

**Major Project**

**Scooter**

**George Mabey**

- **800 000** Sold a year in UK
- **4Kg** Average weight of micro-scooter
- **$200 million** 2007
- **$20 million** 2001
- **15 minutes of exercise** a day reduces obesity risk by 50%
- **56 min** Average commute time
- **40 Kg** Micro-scooter growth
- **$200 million** 2007 growth
- **$20 million** 2001 growth
- **Micro-scooter record speed of 55mph**

**To Learn**

- Composite Materials
- Folding Mechanisms
- Anthropometrics

**Deliver**

A micro-SCOOTER capable of folding to WITHIN the diameters of an A4 sheet of paper.
