

jewellers
CONCEPT

Jewelry made out of non precious material
I have used commonly found material and
transform it, in such away that it looks aes-
thetically appealing
I challenge myself to create thing which is
not actually a jewelry piece but some thing
which you admire and adore.

Hemispherical structure made out of flat plastic
cord. This hemisphere gives a feel of complete
sphere which is complex but lighter.

Textile ball is warped with thin cotton thread. light interaction of two different material together increase the attraction.

Ball made out of PET bottle, beautiful reflection of light and transparency at the same time.

construction : slices of cylindrical part of PET bottle having same diameter are interlaced together.

Small orange beads stuck on sphere of light weight automotive clay by using inherent property of clay, color interaction of bead and clay makes it beautiful.

Cut pieces of clutch wire is put on sphere of light weight automotive clay by using inherent property of clay. Elasticity of clutch wire makes it bouncy.

jewellery METAL

Skeleton of three dimensional heart made out of Brass wire and randomly create thin wire interlaced Structure on the surface. All the joint are covered with transparent resin, so that it won't hurt the wearer.

I saw through the lines,
Straight lines twisted to rings,
It made me feel so surrounded,

Crossed what we don't cross,
Broke what we don't break,
Now we just...see through,

Then something now unfolded,
The lines are more than blurred,
Its more than just disturbed,
Then again, its not there anymore,
I know you still wonder...
Just the empty space!
I'm Trying to offer sense of relief

I'm with you people,
Surrounded by the lines, rings

Form rings made out of Zinc wire and 4-9 rings of same diameter are interlaced together to form sphere. All different size spheres club together in order to make neck piece. all the joints are covered with transparent resin, so that it won't hurt the wearer.

Copper strips are riveted to form rings and 4-9 rings of same diameter are interlaced together to form sphere. The dynamic sphere is attached with thin copper cord in order to make neck piece

Copper strips are riveted to form rings and 4-9 rings of same diameter are interlaced together to form sphere. The dynamic sphere is attached with thin copper cord which is fixed with copper wire in order to make earring.
