

Original Sketches

My original sketches meant to embrace the variety of styles that are represented in women's fashion today. They were inspired by my roommate, someone who embraces this variety to the fullest.

The three final sketches (shown in the top row) were the ones that I felt best represented that message. These looks are about redefining what it means to be "girly". It's not just about pink, lace, and ruffles, and I thought that skirts were the perfect piece to express this idea.

I tried experimenting with many different patterns, fabrics, and textures to find the perfect designs.
