1

Peugeot partnership February 2013

The aim was to design vehicle for urban megacities in 2030.

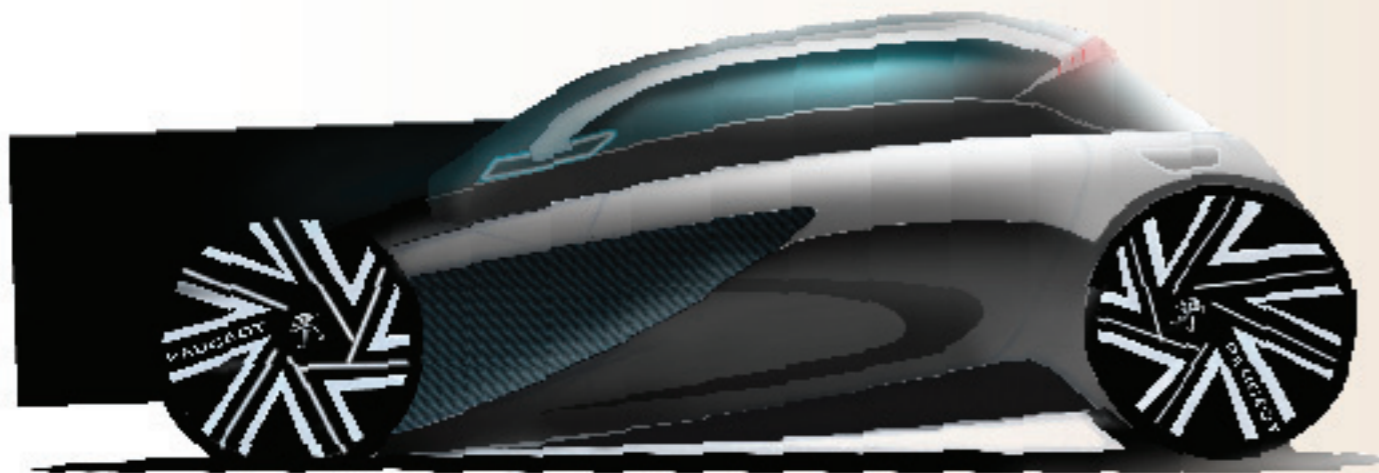

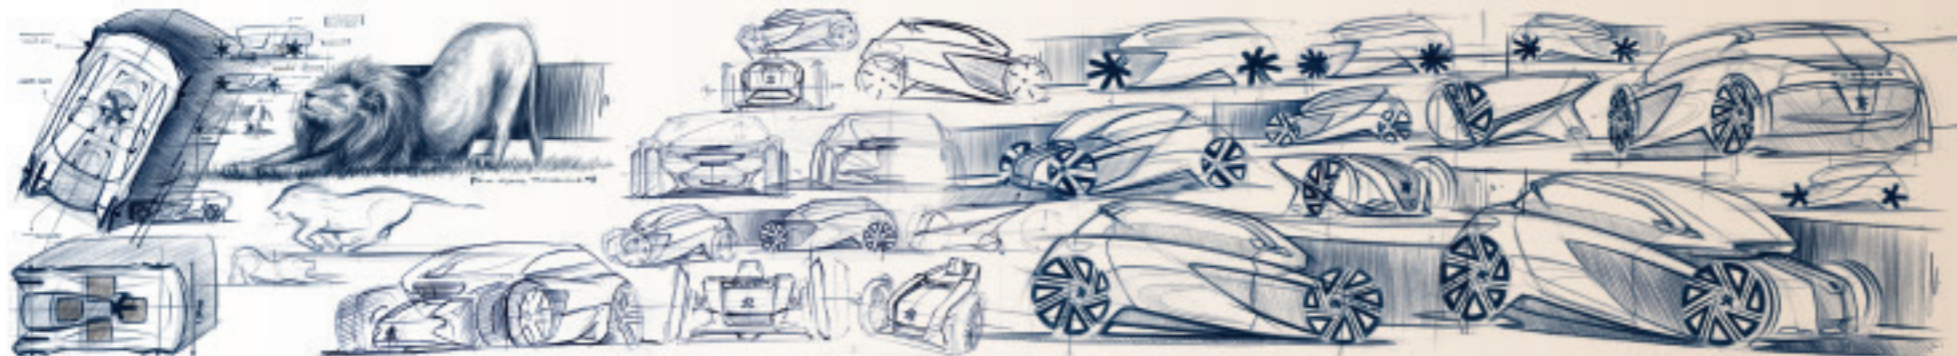

A team work to design 2 vehicles interconnected.

A small vehicle available in city auto sharing network and designed for individual usage in city, and a bigger car designed for out of the city trip.

Once the 2 vehicles are interconnected, it become 1 single car able to transport 4 passengers.

NITRO

SCOOT

2

"Design a motorbike for boats".

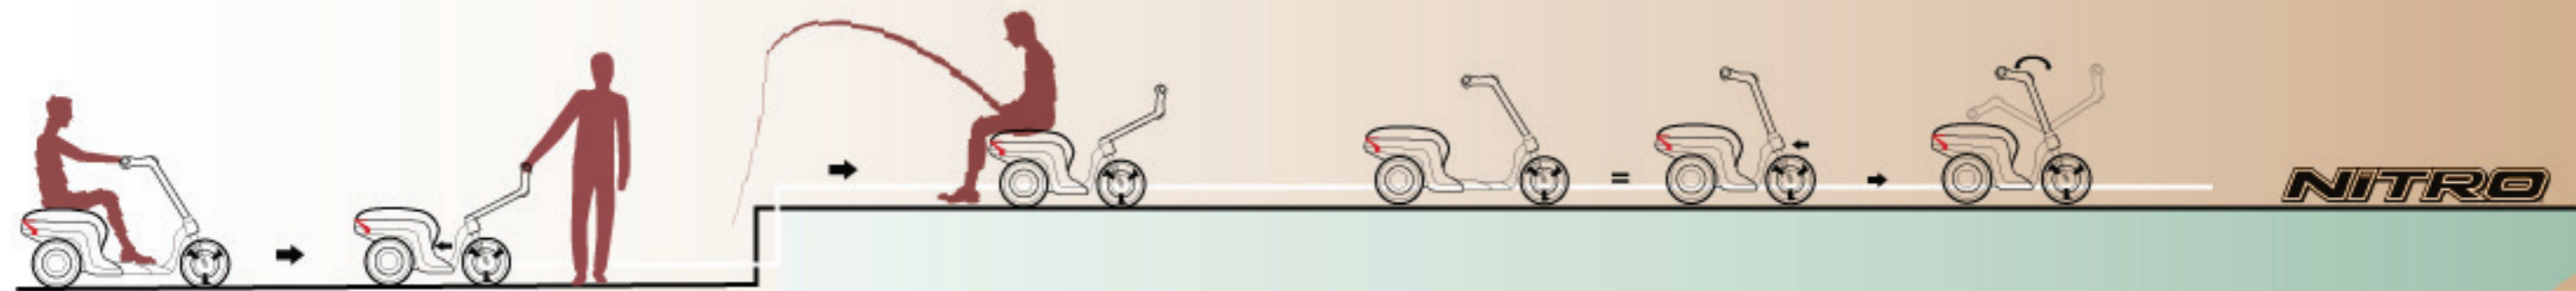

MY target : casual fishing users for NITRO.

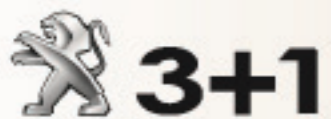

My answer : A scooter for small Fishing Boat, from home to boat.

A flexible, transformable, a comfortable seat for every situations and carry all the fishing materilas.

NITRO

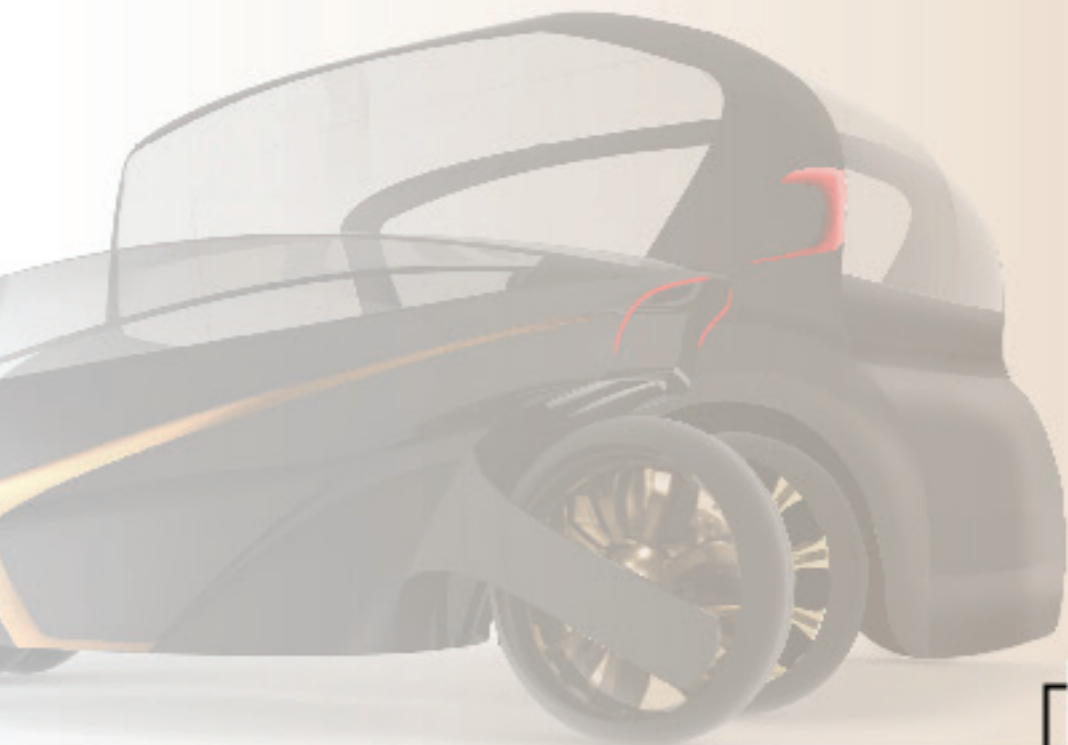

3

"A vehicle for the future Megacities"

The answer : An auto shared vehicle inspired by the sidecar functionality.

Able to provide an individual vehicle for daily city use and serving the family during long trip out of the city.
