

What is it like
in use?

One power button on
either side

Solid white - On
Flashing white - Power low

Two soft power buttons are located on reflecting sides of this symmetrical form. One button will turn on one set of LEDs on one side. For a brighter light source both sets of LEDs can be turned on however only activating one will ensure longer light source if the battery was to run out on only one side. Each button has a light indicator that flashes when the battery is low.
