Template Files Only Workflow

Hank
New User

Need: To understand how the software works and review my data.

Problem: Does he understand the difference between Template and Design files? How they are created and where they are found?

Sue
Advanced User

Need: To get this assay set up fast and review my data.

Problem: I (might) understand how to use this aleady and have a method. Don't make me re-learn this unless its better.
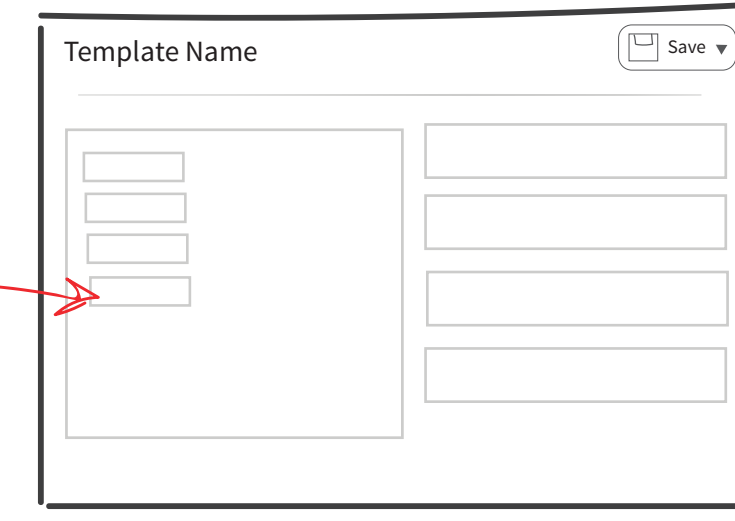

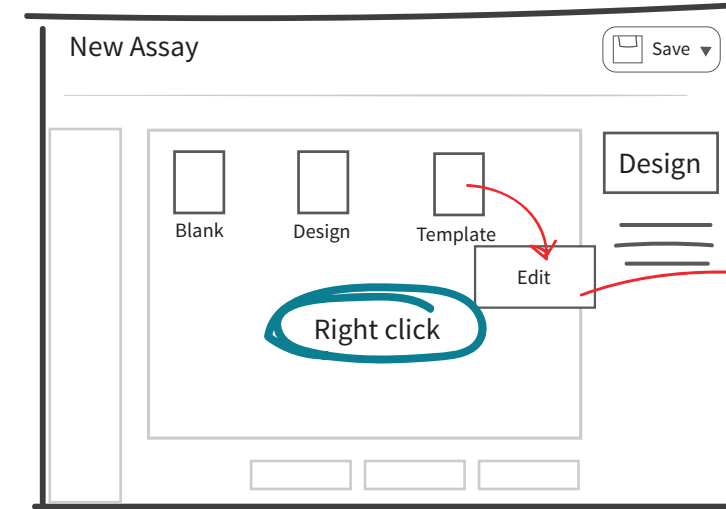

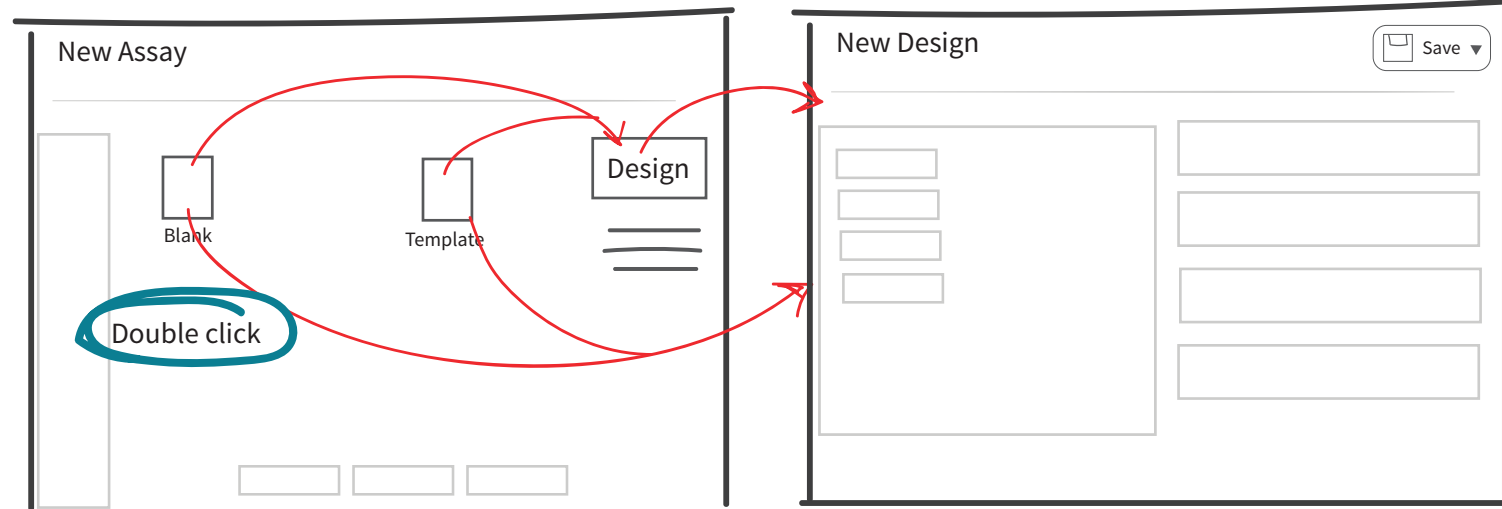

Existing workflow for Design and Template Files

Double clicking Blank creates a New Design file
Double clicking Template creates a New Design file ❓ Unexpected behavior

Selecting Blank and then Pressing the Design button creates a New Design file
Selecting A Template file and then Pressing the Design button creates a New Design file without a name? ❓ Unexpected behavior

Design files are created here but found under the Open tab, not stored in Template directory ❓ Unexpected behavior

Save button is a drop down that asks the user to save as a Template File or as a Design file

Save ▼
    Save as Design
    Save as Template

New Assay – 'New' Under Wave Home

New Assay
