

Appendix F - Instructions

1

eco-eye real-time electricity monitor Instructions and information

2

How it works

Your sensor clip attaches to your live energy cable and wirelessly transmits energy readings, every second, to your device.

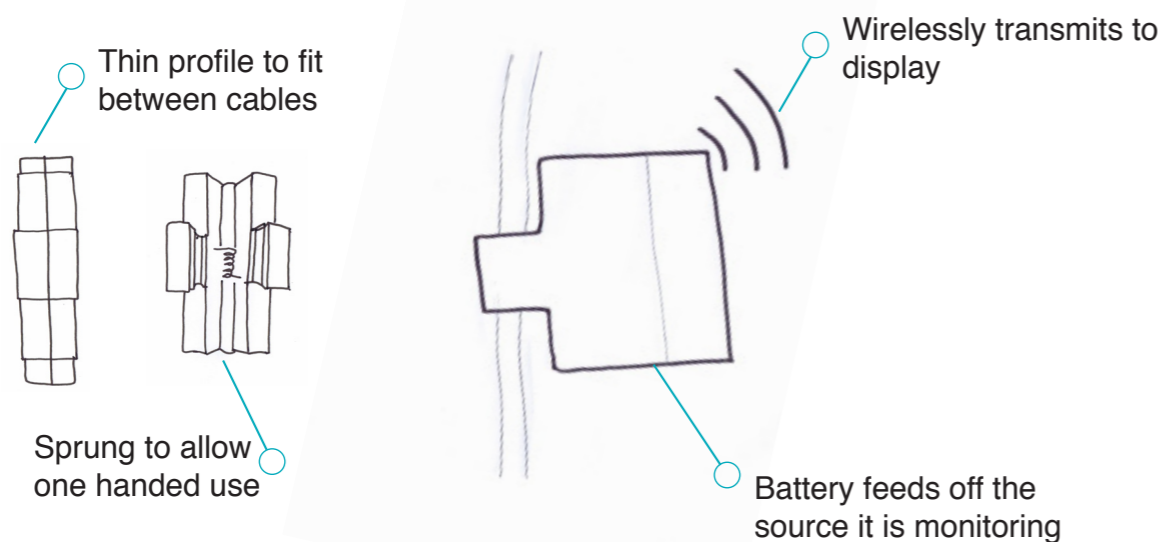

1x Wireless sensor

1x Device

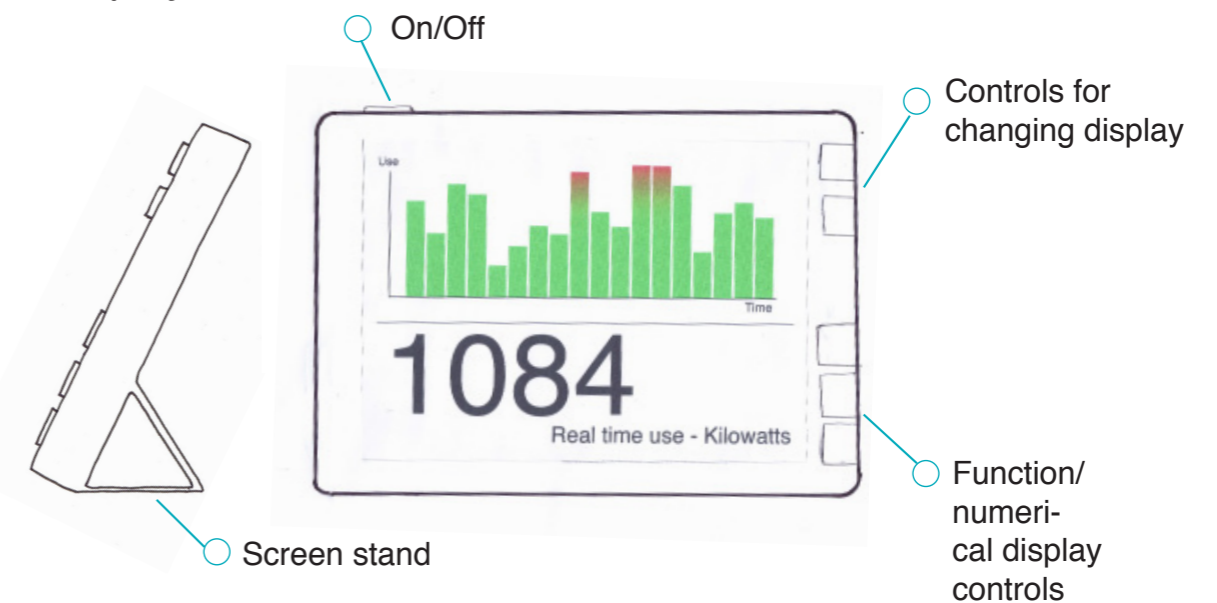

3

Your sensor clip

4

Your display

Your device comes pre loaded with basic information from major energy providers.
By inputting your supplier, age and major tariff, the device will automatically adjust for cheaper tariffs and age related discounts.
