

# Submarine

Working with the notion of extended play, the addition of water guns on the front and back of the submarine seemed appropriate. On the interior walls is a decal of an under water scene to inspire the imagination. Also, the incorporation of a periscope and helm inside the submarine allows the imagination to run wild.

Mounted on the inside in place of torpedoes, these pump guns snap into place and are removable.

Mounted on the back of the submarine this fixed turret like pump gun rotates 360 degrees
