Gerberich's Gadgetry: Art That Moves

Saturday, July 11 through
Monday, October 12, 2015

Visit the North Museum to experience our newest exhibition, "Gerberich's Gadgetry." For this exhibit artist Steve Gerberich creates contemporary mechanical sculpture using a pack rat's treasure trove of tag sale bargains, machine bits, plastic multiples, and obsolete furniture. This alchemist of odds and ends picks through materials searching for possibilities, a crank for this, a gear for that and a plastic dinosaur for that.

"Gerberich's Gadgetry" offers a fun way to explore simple machines, such as levers and pulleys, and how we can reuse household materials. Combining Science, Technology, Engineering, Art, and Math (STEAM) this exhibition has something for everyone. Gerberich's sculptures have been featured on *CBS Sunday Morning*, *NBC's Today Show*, *The New Yorker*, *Art in America* and *Sculpture Magazine*.

This show is made possible by Goldsmith Sponsor Carrie Hill and Silversmith Sponsor Mary Burton.

northmuseum.org • 400 College Avenue, Lancaster, PA 17603
