

pole frame assembly

- 1 A single pole with a connector at one end.
- 2 Two poles connected by a connector.
- 3 Three poles connected by a connector.

Internal Support Frame

1/2" aluminum poles in a septagon (7) pattern support the Trailblazer's soft-shell. They also contain the fire, for if a burning log falls, it will simply lean on the frame rather than fall out of the pit, burning the ground beneath. The frame is also collapsible similar to tent poles for easy transport.
