

zoological park serves as an attraction to people.

Most of us enjoy watching different kinds of anim

als in the zoo. We are so amazed in looking and observ-

ing them. However we should consider if the zoo is beneficial to people or harmful to animals. Keeping the animals in the zoo has its benefits to people. Most of us like viewing animals because it entertain and amuse us. We appreciate more watching animals in variety compared as to looking at them in television. We can take a close look of how they look like for real. We are so curious how they behave, move and make sounds to communicate to their own species and to people as well.
