UL.TRA

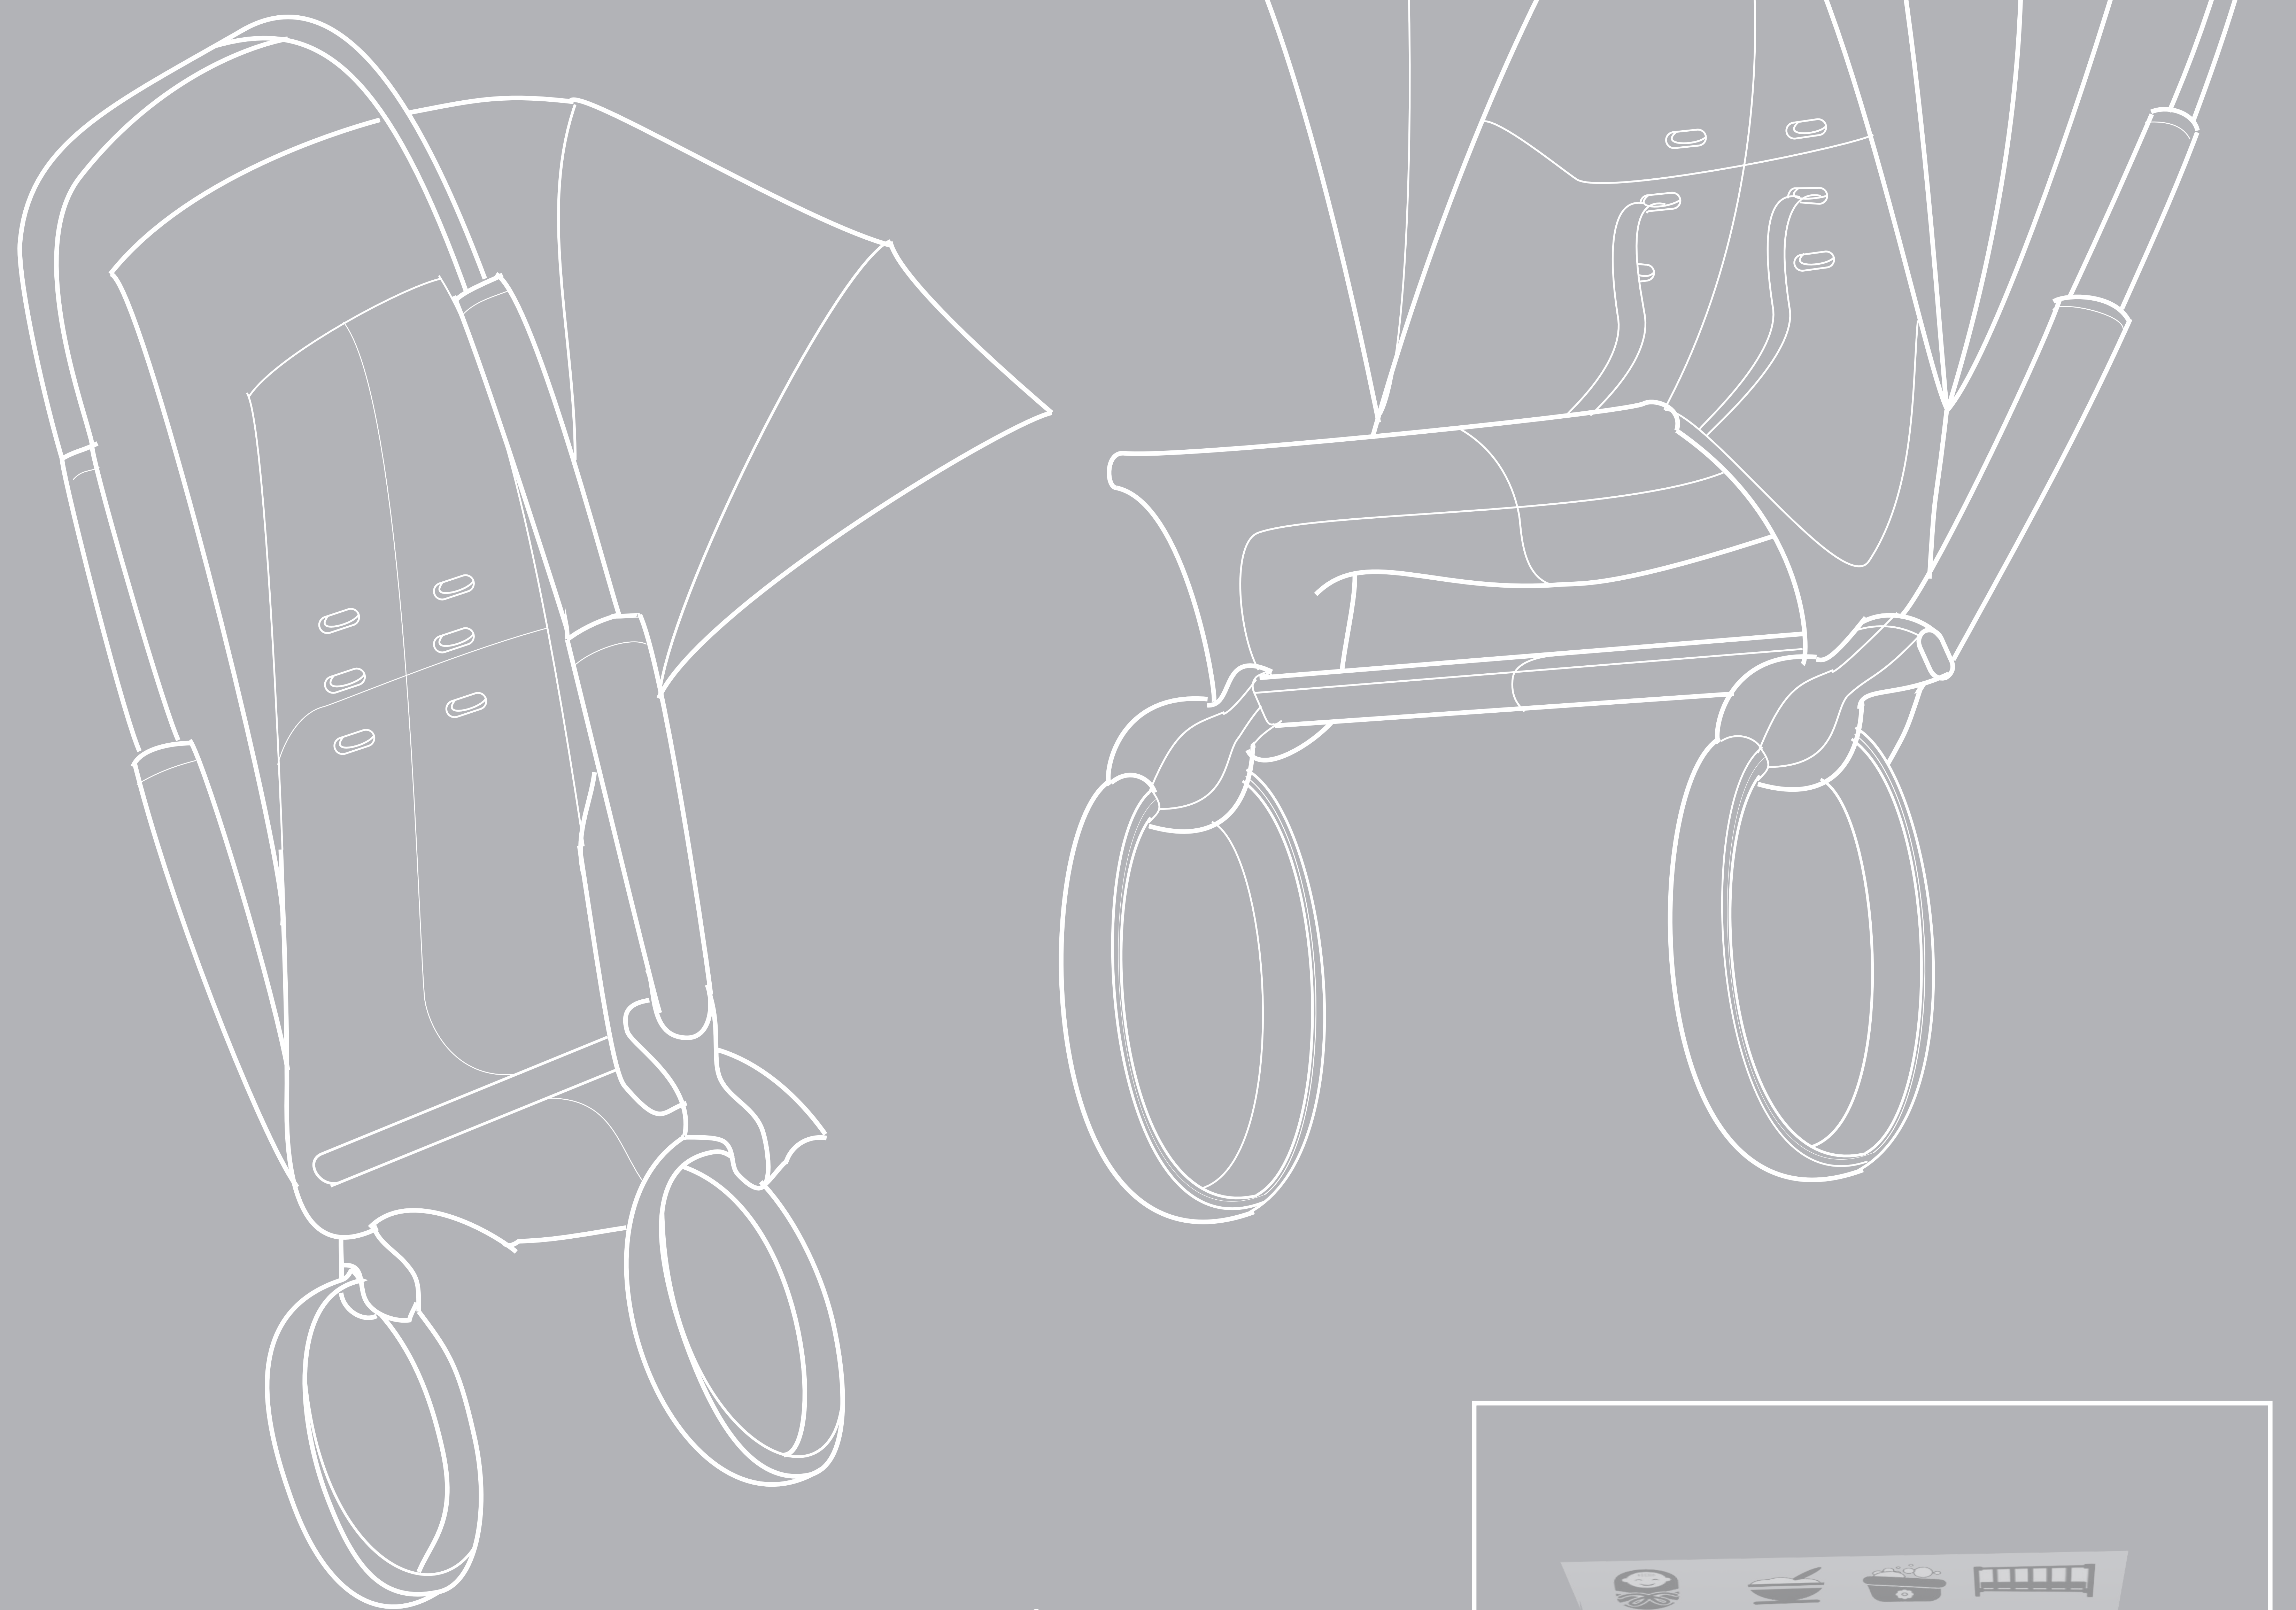

For Baby's Ultimate Travel Experience

UL.TRA is a future concept Travel system with a twist, its ability to fold into a small bag makes travelling with your baby easy and stress free. Its **carbon fibre structure** allows for light weight carrying, whilst its memory shape polymer seating unit allows for maximum folding ability.

Easy-Fold

With its light weight structure made from carbon fibre tubing and flexible shape memory polymer seating unit the pushchair takes seconds to fold. Push the handle down and watch it roll.

Intelligence

The travel system is equipped with state of the art artificial intelligence that allows you to virtually interact with many options that monitor your baby. Choose from terrain wheel control to diaper change alerts. Each option allows you to closely monitor your child to keep them happy on your travels.

Quality in Every Ride
