RENDER: RECEPTION WAITING AND BIKE RACKS

As a part of the Urban Outsiders brand, bicycles are sold at stores and on their website. Being that the office is located in a metropolitan city, employees are encouraged to ride bicycles to work as well as take advantage of public transportation. By doing this the company contributes to the reduction of pollution and land development impacted from automobiles.

RENDERING: SLIDING WOODEN DOOR

Salvaged wood is used on the sliding barn doors throughout the office. Urban Outsiders takes pride in their efforts to help preserve natural materials. By using repurposed materials they are helping to reduce waste.
