Accepts: garbage, compost, demolition, white goods, scrap iron, tires, brush, batteries, electronics

INVASIVE SPECIES

As you know, Minnesota is working hard to prevent the spread of invasive species.

Obtain an invasive species sticker for your water crafts and your trailers. These are available at the DNR, license bureau, and some resorts may have them.

If you take your boat or pontoon to an area lake, remember, CLEAN, DRAIN, DRY before you put it back in Pickerel Lake.

Relax and enjoy our beautiful Pickerel Lake.

Zebra Mussels

STOP AQUATIC HITCHHIKERS!

When invasives win, everyone loses

With over 1,000 lakes, Otter Tail County has a lot to lose when it comes to the spread of invasive aquatic species. Recreation, tourism, lake living, fishing, and more become jeopardized when we don't work together to prevent the spread of invasives such as Zebra Mussels and Eurasian Watermilfoil. These two types of invasive aquatic species can reduce game fish populations, ruin boat engines and steering equipment, and increase the operating costs of drinking water plants, power plants, and dam maintenance. Following a few basic steps can reduce the spread of invasive species within Otter Tail County and help ensure quality waterways and continued economic prosperity for future generations.

CLEAN DRAIN DRY YOUR BOAT

- **CLEAN** off aquatic plants, animals, and mud from boat, trailer, and gear
- **DRAIN** all water from bilge, livewell, and bait container
- **DRY** everything for at least five days OR spray your boat & gear with high pressure or HOT water before entering other waters to remove unseen invasives

• Don't forget! Unwanted bait should be disposed of in the TRASH!

Watermilfoil

Eurasian Watermilfoil

- Become entangled in propellers, or attached to keels and rudders (as seen in picture - above right)
- A single stem can take root in a lake and form a colony - rapidly populating
- Well established native plant life can help detour the spread of Milfoil

Zebra Mussels

- Fingernail-sized, can attach to any solid surface
- Attach to boats, nets, docks, swim platforms, & boat lifts / trailers (as seen in picture - top left)
- Can cause cuts & scrapes to swimmers, cut fishing line for anglers, and clog cooling water inlets and boat hulls

Bylaws of Pickerel Lake Improvement Association Maine Township, Otter Tail County, MN

June, 2011

ARTICLE 1. BOARD OF DIRECTORS

SECTION 1. MEMBERSHIP

The business of the Association shall be managed by a 12 member Board of Directors composed of a representation from the association membership. An effort shall be made to have a representation from all areas of the lake. A slate of candidates shall be presented by a nominating committee appointed by the Board of Directors. Additional nominees from the membership may be presented from the floor. The Board of Directors shall be elected for three-year terms by a majority of the members present at the annual meeting and shall be limited to two consecutive terms. A member may be reelected to the Board after being off for one three year term. The beginning of the term shall be July 1st. Lacking such election process, the president shall appoint a member(s).

SECTION 2. QUORUM

A quorum of any regular or special meeting of the Board of Directors shall be five.

SECTION 3. SPECIAL COMMITTEES

The Board of Directors may appoint committees as determined necessary. They shall not spend funds without approval of the Board.

ARTICLE 2. OFFICERS

Officers of the Association shall be a president, a vice-president, secretary, and a treasurer. The president and vice-president shall be elected by the board. The president shall be elected to a one-year term and may not serve more than two terms. The vice-president shall automatically succeed to the presidency.

The secretary and the treasurer shall be appointed by the board. The secretary and the treasurer are not subject to term limits. The beginning date of the term shall be July 1.

The officers shall constitute the Executive Committee. The retiring president shall serve as an ex-officio member of the Executive committee for one year. The Executive Committee shall have the usual power of officers of a corporation.

ARTICLE 3. ASSOCIATION MEMBERSHIP

Members shall pay annual dues for the calendar year in an amount determined by the Board of Directors and approved by the membership at the annual meeting. The secretary and treasurer shall provide the president with a current list of paid-up members, who shall have one vote per paid membership. The annual meeting shall be the third weekend in June at a place and time designated by the board and board members and shall be sent to members in advance. At the annual meeting reports of committees be received, and other such business transactions for the general welfare of the Association may properly come before the meeting. A quorum at any regular or special meeting of the Association shall consist of twenty members.

ARTICLE 4. REPLACING BOARD MEMBERS WHO CANNOT COMPLETE THEIR TERMS

If for any reason the vice-president cannot complete his/her term, the board will elect a replacement from among the board members. That replacement will serve until the next regular election. If the treasurer or secretary is unable to complete his/her term, the president will appoint someone to complete the term in question. Such an appointment will be subject to the approval of the majority of the board members present at a regular meeting. If for any reason other members of the board should be unable to fulfill a term, the president shall appoint a new member who will serve out the remainder of the term in question.

ARTICLE 5. AMENDMENT OF THE BYLAWS

These bylaws may be amended by the membership at any regular or special meeting of which due notice has been given when approved by a majority vote of those present and voting.

ARTICLE 6. PARLIAMENTARY AUTHORITY

Robert's Rules of Order as revised shall be the authority on all questions not covered by these bylaws.

PICKEREL LAKE STEWARDSHIP

Knowing what you can and cannot do in the water and on the adjacent shore land area is an important stewardship practice. Everything that you put on your lot has the potential to make its way into the lake, either through run-off or through leaching through the sandy soil.

Follow these guidelines to lessen the impact on the lake:

LAWN CARE

No fertilizer is best. But if you wish to fertilize, it is the law to use fertilizers with out phosphates.

Fertilize in the fall to lessen impact on the lake.

Make certain leaves and other debris from your lot do not end up in the lake. Care during fall cleanup will prevent this.

Find a place for a compost pile on your property. You can add to this compost pile throughout the growing season. To speed up composting, add a little soil and also some water if it is dry.

BURNING PERMIT

You are required by law to have a permit to burn vegetative materials. You need to first apply for a \$5.00 permit through the DNR which is valid for a the calendar year. This can only be done online at <http://www.dnr.state.mn.us/permits/index.html>. You will need to pay with a credit card. Once you have your permit, there is a process you follow to activate the permit each time you want to burn by calling an 800 number, which is listed on your permit.

CREATE A SHORELINE BUFFER

A shoreline buff is an unmowed strip of native vegetation designed to protect our lake from run off from our property and to support fish and wildlife habitat. Otter Tail County Land and Resource Management in Fergus Falls and the Soil and Water Conservation District in Perham are good resources for information.

FIRE PITS

Ashes contain phosphate which is harmful to the lake.

Place your fire pit **AWAY** from the shore.

All fire pits need a bottom so that ashes do not leach into the soil. When you remove your ashes, make certain they are completely dead and dispose of them properly.

FIRE WORKS

Fire works are harmful to the lake. Plan your fireworks display on the back of your property on a road. Never shoot fireworks into the lake.

HUMAN SAFETY GUIDELINES

All dogs must be on a leash. Be respectful of your neighbors and clean up after your pets.

Follow the speed limits on our lake roads. They vary but the best advice is to **GO SLOW** when driving on our lake roads.

WATER SAFETY

All water skiers must wear a life jacket while skiing. There should always be at least one other person in the boat besides the driver.

Do not use jet skis before 9:30 AM or 1 hour before sunset. This is a Minnesota state law.

Travel at slow—no wake speeds within 150 feet of the shore.

UNIVERSITY OF MINNESOTA

Onsite Sewage Treatment Program

Preparing Seasonal Septic Systems and Cabins for Winter

Closing a septic system for the winter is a vital task for seasonal homeowners to prolong the life of the system and to keep it operating at peak performance. Precautions taken in the fall can help prevent a frozen system.

Winterizing the Pipes in the Cabin

- Do not add automotive antifreeze, salts or any other additives to your plumbing.
- If you leave the water on for the winter, be very sure that there are no leaks or drips. This constant, low flow of water can cause septic system freezing. This is common with high efficiency furnaces.

Even if the heat is left on, it is a good idea to drain water supply lines. Shut off the water where it enters the house and drain all lines. Drain the pump and then run a couple of seconds to be sure all water is out of the lines. Drain the system by opening all the faucets, leave faucets open. Completely drain the pressure tank. Flush toilets and add RV antifreeze to the tanks at the recommended dilution ratio. Check flexible hoses in sinks and bathtubs to be sure they are drained completely. Remove and drain inlet hoses for the dishwasher and clothes washer. Clear the water valve by starting the machine for a few seconds, then drain the tub. Remove the drain hoses, drain completely. Disconnect the electrical supply to the pump, water heater, softener, washer and dishwasher. Drain the water heater and water softener with a hose after power is disconnected. RV antifreeze can be added to traps in sinks, bathtub and shower drains, washtubs, floor drains and sump pumps. In the spring, re-connect all hoses and flush the lines out before using again.

Furnace

If you have a high efficiency furnace that is left on for the winter, be sure there is no water drip into your system.

Freezing can result. Re-route the drip water to a floor drain, bucket or other source that does not enter the septic system at all, or enters in larger amounts. This water does not harm the septic system, but entering in very small amounts causes a trickle of water, which can freeze more easily. If shutting off the furnace, drain all water from forced hot water and steam systems unless the system contains antifreeze. If that is the case, call a plumber for assistance. If leaving the furnace on, it is a wise idea to conserve energy by installing a low-heat thermostat that will maintain the cabin at 40 degrees.

Cleaning/Pumping The Septic Tank

Consider pumping the tank if closing the cabin for the winter, or if it will only be used a few times during the winter. If you live in an area with a high water table, you should only pump out the tank if the tank was designed for high water table conditions. If a tank is left full but the system is not used for the winter months, the sewage will get very cold, and can even freeze. If the cabin is opened before temperatures in the soil start to rise, the effluent leaving the tank will be cold. By starting with an empty tank, you can then start fresh with warm effluent, which is desirable in the soil treatment area.

Vegetative Cover

Stop cutting the grass over the soil treatment area in mid-September. The extra grass length will help capture snow, providing insulation over area. This can help prevent freezing.

Protect the Soil Treatment Area

Keep all foot and vehicle traffic off the tank, pipes and soil treatment area (drain field or mound). The only exception is the lawn mower. Do not plow snow off the area or store plowed snow over the drain field.

The Beginnings of Early Pickerel Lake

East North Shore Drive

by

Mary E. Wold

Circa 1998

Paul & Helen Sundberg

Fire No. 324

David Sundberg purchased a 130 acre farm on the northeast part of Pickerel Lake in 1914. The farm included approximately one half mile of shoreline, or from the point, presently owned by the Happy As a Clam Land Trust to the lot owned by Wold's. The point was the first lot sold by the Sundberg's in 1947 for \$1,000.00 and was purchased by Dale and Lone Klaessy. Other lots were subsequently sold for \$300 - \$500 for 60 feet of shoreline.

David Sundberg died in 1953 and his wife, Christine died in 1962. The farm then went through probate proceedings and was purchased by Floren Mullen, who in turn, sold the remaining shoreline to Ray Sandberg and Rev. Doug Dahlquist. Mr. Sundberg developed and sold the remaining shoreline. Value of the lots increased from \$300 - \$500 to \$10,000 between the late 1940's to the mid 1970's.

The first cottage was built in the late 1920's on the southeast part of the lake. It was owned by Paul and Helen Rodifur who was an attorney from Iowa. He and his wife spent each summer at their cottage. Mr. Rodifur spent many hours fishing for bass and pickerel. It was not unusual to catch northerns that weighed over 10 pounds. The common lure was a red and white daredevil.

The Rodifur's had one son who preceeded them in death.

The Rodifur's had a close friend, Jack DeWitt, who spent many summers with them. He later moved to Hollywood and became a movie writer. His most notable film was "Red Skies Over Montana" which was filmed in the 1940's.

Another notable fisherman in the 1930's and 1940's was Bill Westover who farmed several miles north of Pickerel Lake. He fished from a 10 foot flat bottom duck boat and never used a motor. The only artificial lure he used was a daredevil and for bass he used frogs, worms and grasshoppers.

Written by Paul Sundberg

Harmsen, Lola (Mrs. Mike)

Fire No. 224

The waters of Pickerel Lake lured two couples from Pipestone, MN, who had stayed at Peace Camp on Otter Tail Lake. They were Mike and Lola Harmsen and Jack and Ethel Harmsen.

The excellent fishing on Pickerel helped them decide to buy property. The fishing dreams always came true; catching northerns between 15-20 pounds.

A Mr. Quist would fish at 5 a.m. for bass because he didn't want anyone to know where they were. Their cottages were the 4th and 5th built on North Shore Drive. Outhouses were part of the landscape. They had an offer from Conrad Haggstrom to purchase their property (Fire No. 224) to the Haggstrom Resort (now Loll's) for \$1000.00.

Lola, now 90 years (with her Red 1974 Plymouth) drives up regularly to spend summers at the cottage which she shares with her family.

Nelson, Harlan and Kathie

Preceding Pickerel Lake, Henry Nelson (Harlan's dad) from Milnor, N.D. fished Anna and Pleasant Lakes. They met Conrad Haggstrom and were introduced to Pickerel. In 1947, Henry bought 50 feet of shoreline for \$100.00 Fire No. 225. This was also pasture land for the Haggstrom cattle and horses. In 1958, Harlan and Kathie bought 50 feet for \$300. Fire No. 205. This was the beginning for Harlan and Kathie.

Heinie and Marian Trondson

Fire No. 232

Because of the Harmsen's enthusiasm about Pickerel Lake, an invitation was all they needed to buy a lot. A 50 foot lot was then \$200.00.

They were fishing and water enthusiasts, and acquired many friends. In the early 1950's they, with neighbors contacted the REA Electric in Pelican Rapids to acquire electricity for the area. After cutting down trees thru the woods and wiring their cottages, electricity came to that part of the lake.

In 1957 they sold their property and, came back in 1971 to care for their daughter's property. In 1983, they moved to Annandale where they retired and spent their last years.

Now owned by Ardis Fixen.

Haggstrom, Conrad & Tillie

(Now Loll's Resort)

Their farm property (which went west to David Sundberg property, Fire No. 234, and south & west to Eberharts, Fire No. 65) is now rows and rows of summer cottages and year round homes on Pickerel Lake. The resort, which they started in 1940, is where the cow pasture was. They built 4 cabins and also used a chicken house (people needed a place to sleep). The store building was built a little later (because renters needed necessary groceries, candy, pop, bread, hand dipped ice cream, etc. A shuffle board was put in, coffee was sold for 10¢ a cup plus goodies. There was a washing machine but no dryer sheets (made from flour sacks) and towels. Clientele came from North and South Dakota, Nebraska, Pennsylvania and Iowa. When the families left, she would have a bag of candy for the children. A Judge from Canton, South Dakota, called her on a birthday thanking for her wonderful memories.

They had wooden boats, repainted them every spring. Conrad charged 50¢ for pulling water skiers or a leisurely ride on the lake.

Conrad sold lots on the pasture land, west to David Sundberg's property (Fire No. 234). He sold property to Paul Rodifer who had built a cottage on the southwest part of the lake, purchased it back from him in 1950, moved in 3 more buildings and had another resort, which is now owned by J.B. and Kay Rogness for their family.

Tillie would go fishing at night – to the Point (now Hanley's) and back, trolling, catching walleyes and northerns).

Conrad died in 1975, Tillie now resides in Fergus Falls.

Great Memories of Great People!

Through the years on Pickerel Lake

Since the Haggstrom families were so well known and the first prime owners of the land on Pickerel Lake, here's a little of their background.

The following was taken from the Mason History:

John G Haggstrom

The present age demands of men who are to attain a position of prominence in the world, self-reliance, industry and an unswerving devotion to duty. All of these elements of character have been exemplified in the life of John G Haggstrom, who has gained more than ordinary recognition in the agriculture field. He who is the subject of this sketch was born on January 1, 1853, in Sweden, and is the son of Gustav Pearson and Mary M (Greta) Pearson, both of whom were born in Sweden. The parents of John G Haggstrom never left their native land, (where they lived on an old homestead), to come to America as most of their neighbors were doing at the time. They were devout members of the Lutheran Church.

John G Haggstrom came to this country in 1869, at the age of sixteen years. He landed at Quebec, Canada, practically alone and without friends upon whom he could rely until he was started in the business world. He went first to Detroit, Michigan, and then to Chicago. In Lockport, Illinois, where the subject of this sketch finally took up his residence, he worked for fourteen years in the stone quarries and as a carpenter of that community. The initial appearance of John G Haggstrom in Otter Tail county was made in December, of the year 1882. After remaining at Pelican Rapids for four months he moved, in 1883, to the town of Maine, where he bought forty acres of land. In 1884, he bought thirty-two acres of land and three years later added twenty-seven acres to his possessions. In 1900 he bought twenty-seven acres and seven years later added forty acres to his farm, which now extends over an area of one hundred and sixty acres. The farm is in an excellent state of improvement and the owner continues to keep it supplied with all modern conveniences.

John G Haggstrom was twice married, first to Mary Johnson, the daughter of Jonas Johnson, on the 27th of June, 1882. To this union were born Amanda, who is a nurse in Moscow, Idaho: five children who died in childhood, and one son, who died at the age of twenty-two years. His first wife passed away on the 3rd of August, 1896. On the 4th of June, 1898 he was united in matrimony to Hannah Honson, daughter of Hans Pearson, a native of Sweden, who never emigrated to this country. Mr. and Mrs. John G. Haggstrom have

two sons, Conrad and Gutaf Adolph, and are members of the Lutheran church, which they attend regularly. In political affairs, the subject of this sketch has never taken a prominent part but has been content to devote his time to his agricultural interests. In traveling over the rural sections of the country, Mr. Haggstrom finds an automobile an indispensable convenience.

The beginning of development on Pickerel Lake was started in the late 1940's. Lots sold for between \$300-\$500 for 60 ft. of shore. In the middle 1940's four cabins made up Haggstrom's Resort, owned by Conrad & Tillie Haggstrom, which was located on the east side of the lake. In the early 1950's Adolph and Ethel developed another resort on Pickerel Lake. It was located on the west side of the lake with 9 cabins and became known as Shady Nook.

In the early 1960's the Pickerel Lake Club was organized with 64 paid memberships. The name was changed to Pickerel Lake Improvement Association. Through the years the lake was stocked with walleyes and northerns.

By the 1970's lots sold for \$10,000, membership has increased to 161, lake homes had to be 100 feet from the shore, a weir was installed to help control lake level, property owners had fire numbers and a Pickerel Lake Directory.

With the 1980's came excellent water quality reports, more stocking of walleyes and northerns, Dutch Elm disease, permits for building and sewer systems, garbage collection racks, and permits for the 4th of July boat parade.

Memories of Pickerel Lake

My memories of Pickerel Lake go way back, as I have spent every summer of my 62 years of life out here. Granted, I don't remember the first 3 or 4, but the rest are fond memories.

My parents Lawrence and Thelma Jensen purchased a 60 foot lot on the north east end of the lake from Conrad Haggstrom in 1948 for \$250.00. And in 1952 they built a cabin that was just open studs and unfinished inside. In order to get into the original lot we had to come in from the north past the Sunberg farm, and park by the edge of the road and walk in through the woods. Later my dad and a few of the neighbors cleared a road, and a few years after that there was a cleared path through the woods that went around the North East side of the lake which turned into the road that is there now. A typical trip from Fergus Falls to the lake for the weekend would include a stop at the Pure Oil station on the east side of town, where Bjs is now. My dad would fill up the Kerosine can for the lamps as we had no electricity for the first few years, and he would get a block of ice for the ice box, which amazingly would last most of a week. At that time County Road 1, The Ottetail Lake Road was gravel from town all the way to the lake. When we got to the lake the first thing we did was get some water out of the lake to prime the hand pump with so we could fill the water bucket that sat next to the sink. As the years went by more and more cabins popped up, and more people came to the lake for the summer. At one time we had three resorts. Haggstroms on the east end, Rodifer's, were on the southeast end, and Shady Nook was down on the south west end also owned by one of the Haggstroms, Adolph. We had a cedar strip fishing boat that always had about 4 to 6 inches of water in the bottom. We would dig a can of worms and catch sunfish, perch, and as we got older we found the nice walleyes. We usually had 10 to 12 of them swimming around in the bottom of the boat when we got home. Back in the old days most of the shoreline was part of somebody's farm, so that's kind of where it all started, buying lots from the farmers. My property which is on the north west end of the lake, which I purchased in 1975 was originally Henry Moores corn field when we were kids. One of the highlights of being on Pickerel was traveling across the lake to Haggstroms Resort, to get an ice cream cone, as they had about every kind of ice cream there was in their little resort store.

As the years have gone by and I have watched our lake grow, the simple easy way of life and having fun has kinda gone by the wayside. The cabins are disappearing and the huge homes are going up and its getting more like a small town than going out to the lake for the weekend and enjoying the peace and quiet. Granted our lake is still the best place there is to be, however, we have new obstacles to look forward to such as Invasive species, mill foil, Zebra mussels, etc. Hopefully we can keep our lake clean and be able to enjoy it for many years to come. Enclosed is a picture that I found of my dad Larry and myself in about the 1954 era. As you can see I started my boat driving duties at a pretty young age, and I'm still going strong.

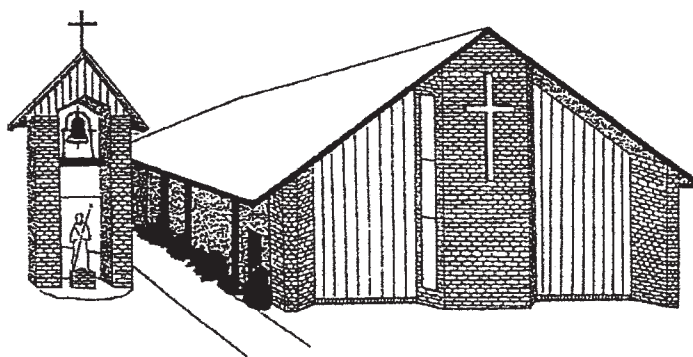

Saint James Catholic Church

Maine, MN

Parish History

The first Catholic settlers came from Wisconsin and Canada between the years 1875 and 1882. During that time, the community was visited two or

three times a year by neighboring priests. The first recorded mass celebrated in Maine was on October 1, 1881, at the home of John Barry, Sr. It was the funeral mass for his daughter, Bridget. In the early days, the parish was 75% Irish. The rest were German, Bohemian, and English.

When Fr. Joseph Boever became pastor, mass became more frequent. Services were moved from the Barry's to Patrick Moore's home because his farm was centrally located. In 1882, Fr. Boever listed 26 families on the parish register; by 1949, the number had grown to 30. In these early years, the parish was administered by priests from Fergus Falls, Perham, St. Lawrence at Rush Lake, Wadena, and Blue Grass.

As the years passed, sentiment was growing that a church should be built, since Round Lake was considered the center of Main township, parishioners wanted the church built in that area. Two brothers, Patrick and Daniel Moore, each donated five acres of land for the church and cemetery. The church, including the bell tower, was built out of lumber in 1891 at a cost of \$1,000. Rev. Otto Zardetti blessed the church on November 3, 1893, and called it St. James at the suggestion of Patrick Moore. On the day of the dedication, John Barry, Jr. took up a collection to pay for the pews.

In 1896, all necessary items for saying mass were purchased including an organ. Up to this time, the priests would carry all these items with them. The bell for the bell tower was purchased in 1911. Saint James parish was legally incorporated on February 23, 1900.

It became necessary to enlarge the church to twice its former size in 1913. A sacristy was included in this addition. A small basement was dug to install a hot air furnace.

In 1919, Bishop Joseph Busch considered the parish large enough to support a resident priest. He appointed Rev. John Widenborg as the first resident pastor and instructed him to build a parish house. Father also had Foxhome as a mission.

Rev. James Mohm was appointed pastor in 1930. During his fifteen year stay, the church yard and cemetery were cleaned up and beautified.

The church and rectory were wired for electricity in 1938, and a parking lot was purchased west of the parish house.

Rev. James Mohm did not drive, so various parishioners would drive him to the mission in Foxhome. When Rev. William K. Loeckner came in 1945 with his car, a garage was built for him.

-Reprinted from the St. JBITS Centennial book.

July 28, 1991

Zion Lutheran

Zion Lutheran began its ministry on January 31, 1878. Several Scandinavians had settled here as early as 1870 and many of them keenly felt the lack of religious services. Meetings were held in the homes and later in the schoolhouse. It was not until 1877 that a real movement for organization was started and on January 31, 1878 a meeting was held for this purpose. At this meeting Rev. S.J. Kronberg held regular service and immediately after services a congregation was organized.

This organization was made as a part of a pastorate composed of Central Swede Grove, Elizabeth, and Gotalund. In 1880 Fergus Falls became a part of this pastorate by taking one third of services from Elizabeth and paying one third of the Pastors salary. In 1881 at the annual meeting it was decided to start a Sunday school.

At the annual meeting in 1883 the question of building a church came up. The church was to be 30 x 40 with 16 foot posts, also an annex on the north end 12 x 20 feet. The most central location was the present site. The building committee was empowered to buy material and supervise the work. The contract for the building was let to J.N. Hultberg for \$140.00 and 80 days free work. The cost of the church was to be raised by subscriptions. At the 1885 annual meeting a resolution was passed that each farmer should give one bushel of wheat for every forty raised so as to clear the debt. It was voted and passed in 1886 and to also build a storm shed in the front. In 1891 the church was renovated on the inside and the steeple was built.

In 1908 a partial basement was made and the furnace installed. Grace Church of Henning joined the parish in 1910. In 1924 electric lights were installed. In the late 1930's the changeover of languages for all services, activities and meetings were conducted in English.

At the January 1926 annual meeting the name of our congregation and church was changed to, 'The Evangelical "Lutheran Zion Church of Amor"'. In 1950 it was voted unanimously to build a new church. Additional construction in 1995 with a new addition sanctuary and narthex and the building debt was retired within three years of the dedication.

The original congregation started with 20 members plus children. In 50 years it grew to 114 communicants and 48 children. Growth at 75 years was to nearly 300. We currently have 598 members committed to ministering to people of all ages and all walks of life.

Our membership consists of young-adults with small children, working adults, a large number of early retirees, and very active senior citizens.

Because our church's youth program is both strong and inviting, our youth actively participate in worship, many outreach activities, and national youth gatherings.

Zion offers both traditional and contemporary services, seating that can accommodate young children, places for those that need assistance, and room for wheelchairs. Since our parking lot and church entrance are user-friendly, it makes it easy for those with disabilities to attend worship and other church functions.

We look forward to seeing you at Zion whether it be for Sunday worship or attending one of our many functions we have throughout the year.

FIRE (Emergency dial 911) / POLICE

Fire (non-emergency):

Battle Lake 218-864-5511
Dent 218-758-2233
Underwood 218-826-6582

Police:

Battle Lake 218-864-8989
Ottertail Cty Sheriff 218-998-8555
MN State Highway Patrol 218-847-1550

Burning Permits: In most cases a permit is required from a DNR Forestry Officer, your local fire department or area fire warden to burn brush or other vegetative materials. During the winter months a permit is not needed as long as there is three inches of snow cover. Computer Link: www.co.otter-tail.mn.us/solidwaste/burningregulations.php

FACT SHEET

Pumping Frequency Worksheet

Cleaning Frequency Guidelines

How often a septic tank needs to be cleaned depends on the tank's design and the way it is used. In this worksheet, factors that increase the cleaning frequency are called **effects** and factors that reduce cleaning frequency are called **credits**. The frequency guideline calculated with this worksheet should be used along with the conditions observed when the tank is cleaned to decide when the tank will next need cleaning.

EFFECTS

FACTORS

Enter 10 points for wastewater that enters the septic system from each of these appliances.

- Water softener or water filter _____
- Garbage disposal _____
- Dishwasher and/or automatic clothes washer _____

Enter 10 points if you have:

- An in-home business, such as daycare or beauty shop _____
- More than 4 overnight guests at a time, several times per year _____
- A laundry pattern of doing 3 or more loads in 1 day _____

Enter 10 points if your septic tank is smaller than the size given for the size of your house.

house size	tank capacity
2-3 bedrooms	1,000 gallons
4-5 bedrooms	1,500 gallons
6-7 bedrooms	1,750 gallons
8-9 bedrooms	2,000 gallons

Enter the points indicated if the last cleaning was:

	points
1-2 years ago	0
3-5 years ago	5
6-10 years ago	10
10+ years ago	12

The number of people living in and using water in a household affects the cleaning frequency. Enter the number of people for the house size and do the calculation.

house size	# of people	load	
2 bedroom	_____	- 3 =	_____
3 bedroom	_____	- 4 =	_____
4 bedroom	_____	- 5 =	_____
5 bedroom	_____	- 6 =	_____
6 bedroom	_____	- 7 =	_____
7 bedroom	_____	- 8 =	_____

x 3
(subtract if negative)

Total Effects _____

Points for each Factor

CREDITS

FACTORS

Enter 10 points if you:

- Use a suds-saving or front-loading clothes washer, or do 4 or fewer loads spread throughout the week. _____
- Have 2 full-sized septic tanks, or 1 tank with 150% or more of the capacity required for your house. _____

Enter 6 points if you:

- Are ULTRA-CONSERVATIVE in your water use. _____
- Use low-volume toilets (3 gallons or less per flush). _____
- Use low-flow shower heads. _____
- Have only 1 or 2 people in the house who each bathe fewer than 5 times per week. _____
- Have no one at home for 10 hours or more most days. _____

Total Credits _____

Points for each Factor

Enter your effects and credits in this equation to calculate how often your septic tank should be cleaned.

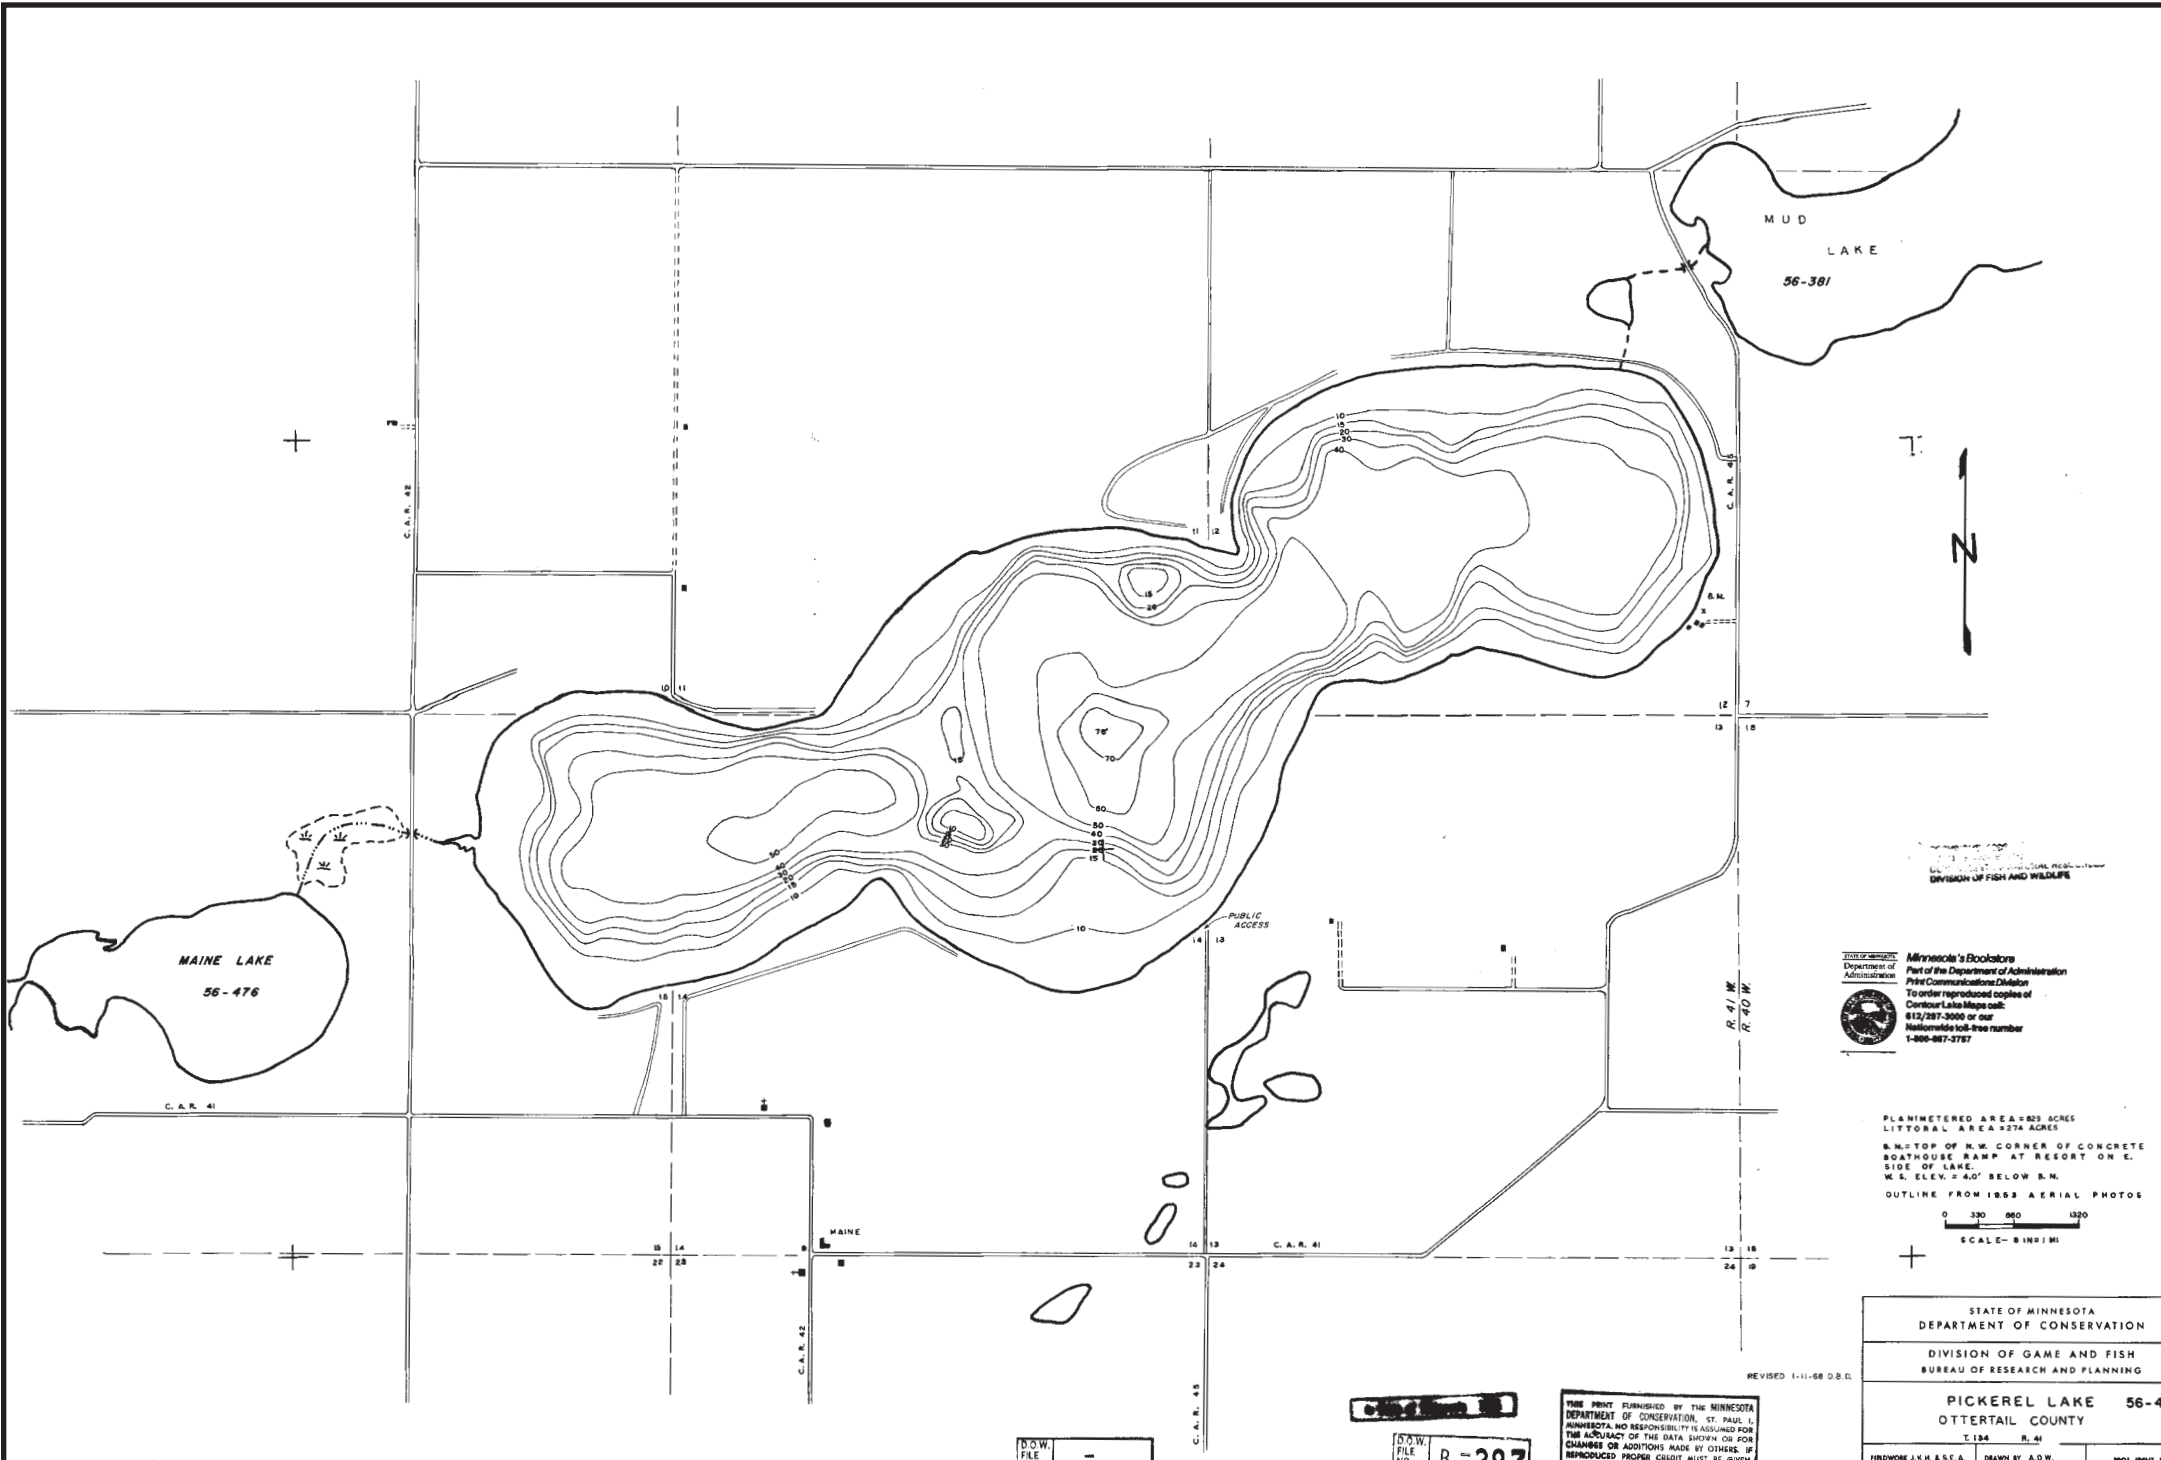

36

Effects + Credits =

_____ months between cleanings

For More Information

Please see our website at: <http://septic.umn.edu> for more information about proper operation of septic systems. Otherwise give us a call at (612) 625-7243. 6/24/03
