

Window Retail Display

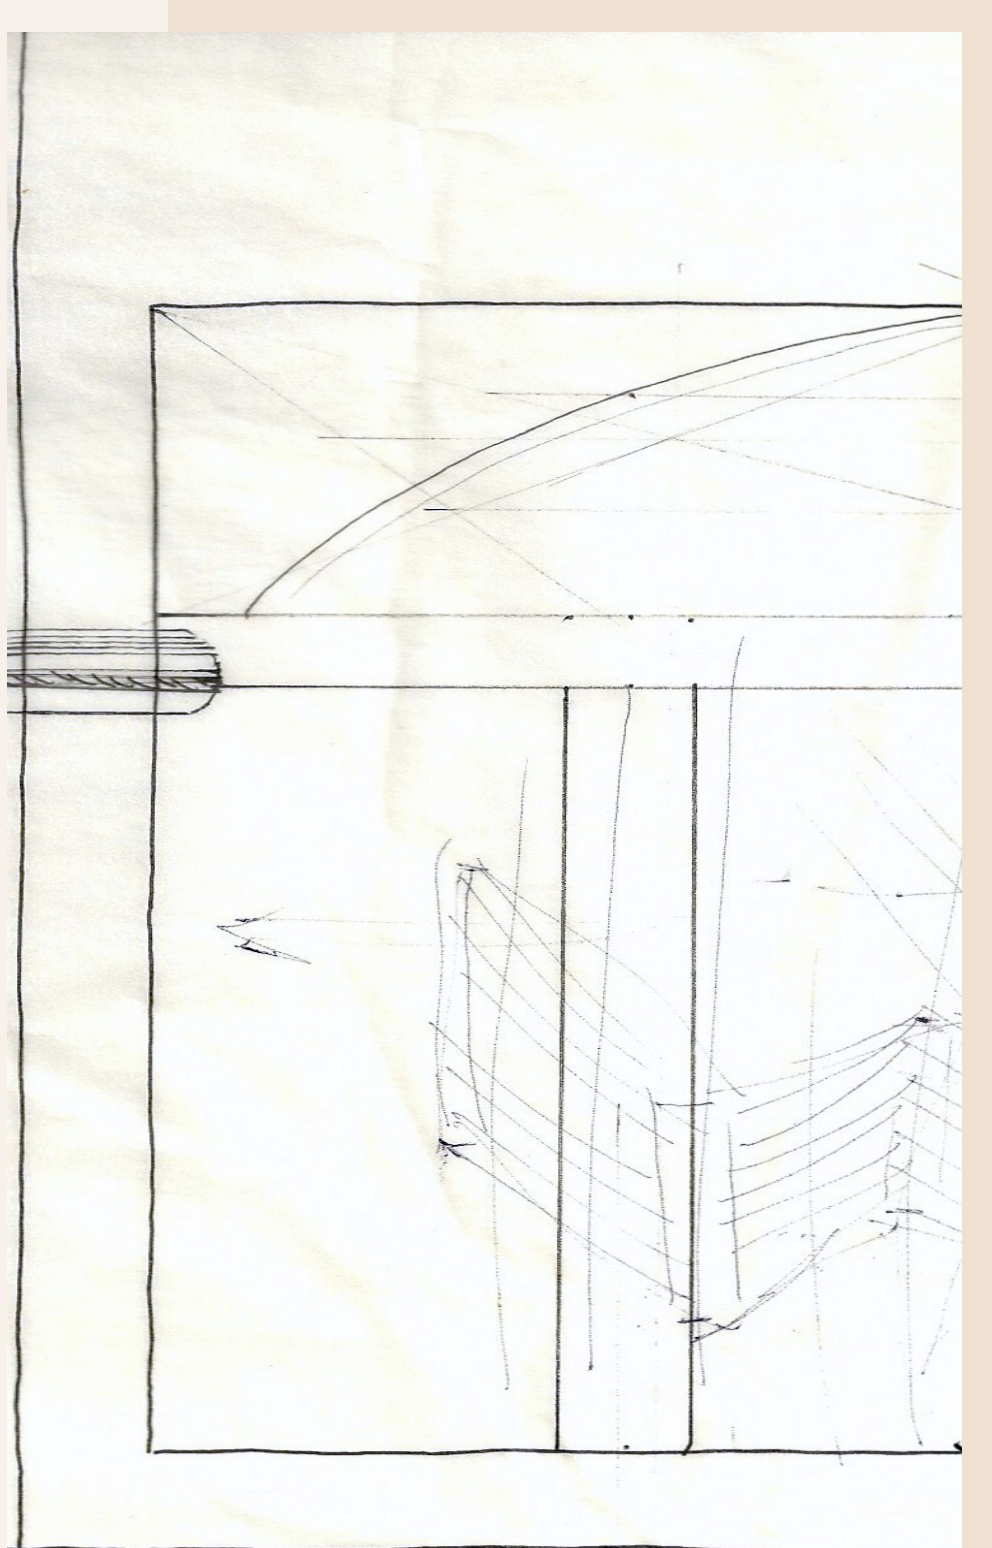

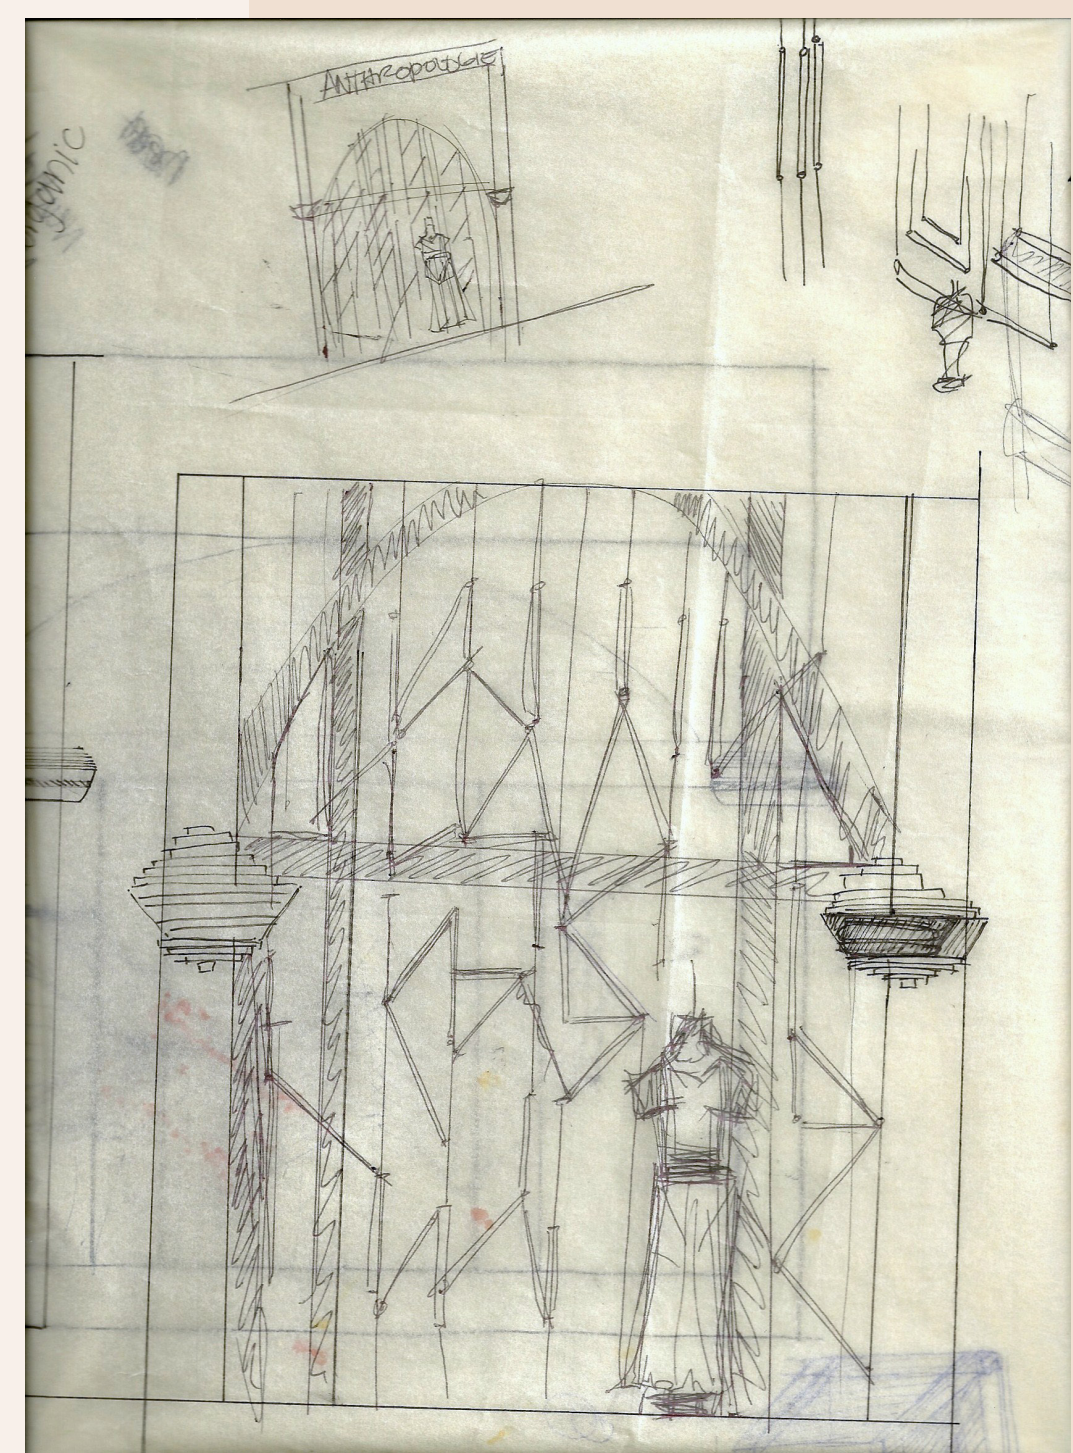

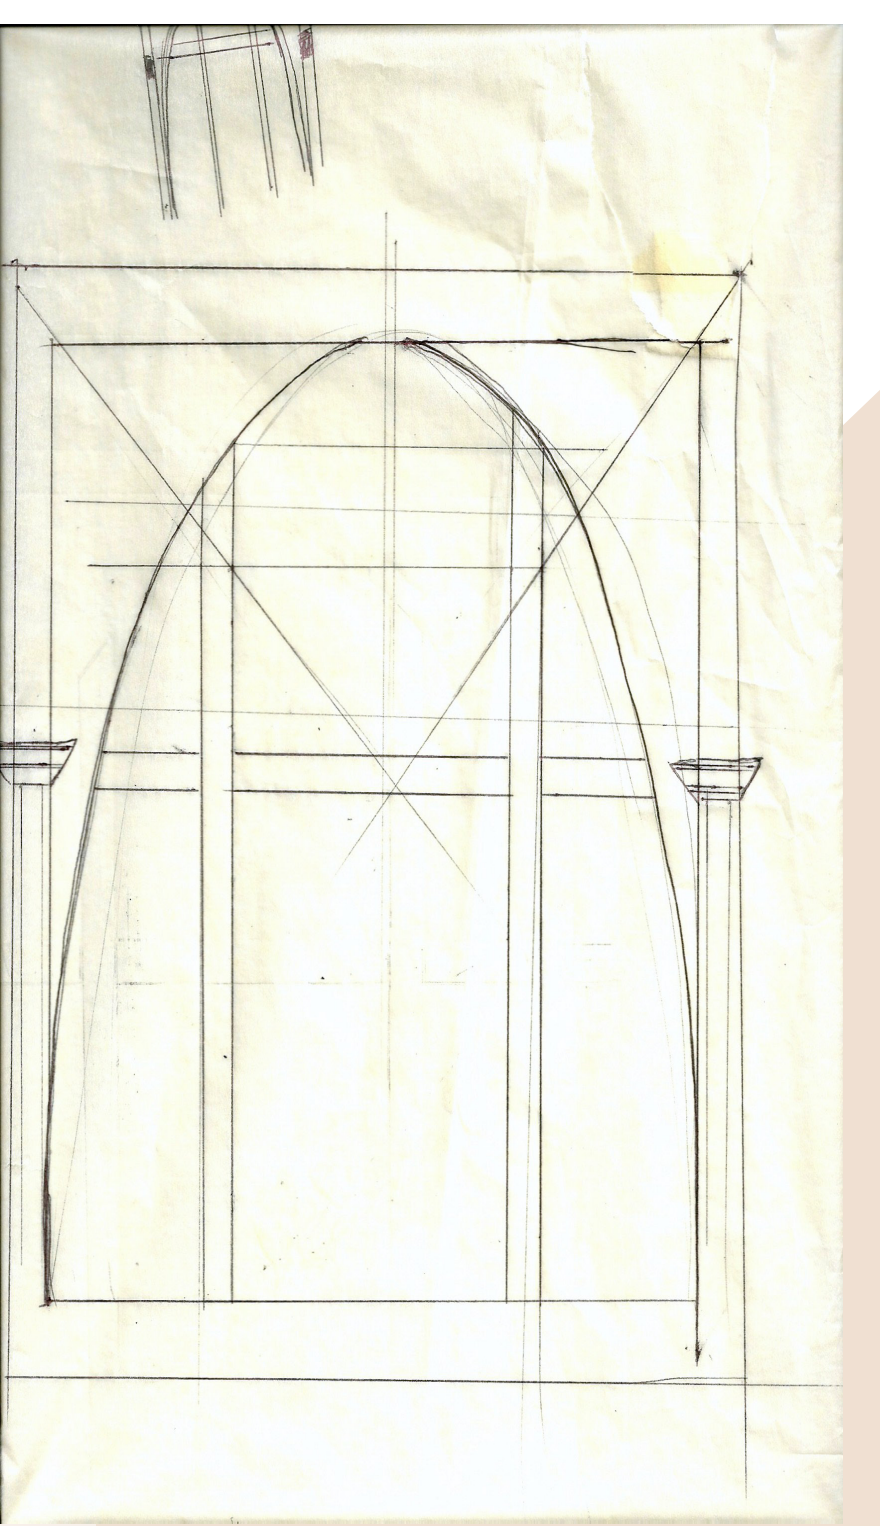

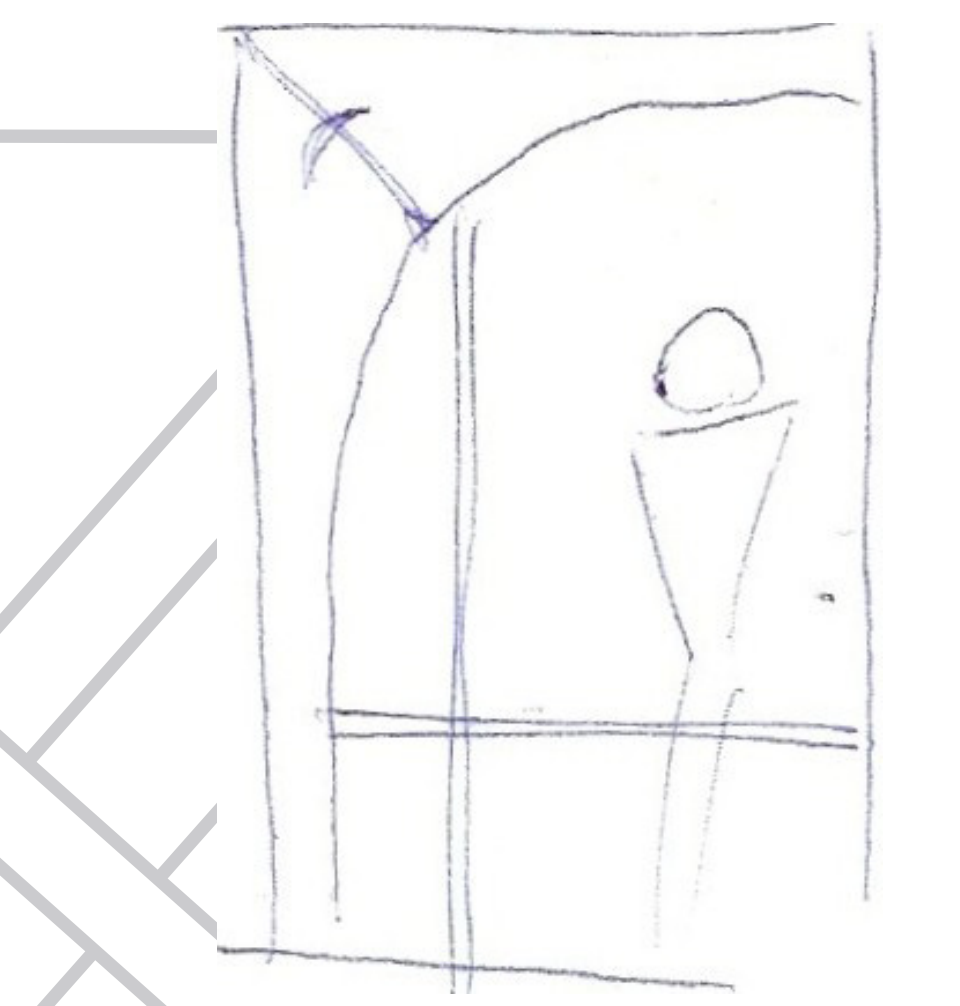

-inspired by Anthropologie

Concept:

This 8'x6' tall Window display was inspired by Anthropologie's spring collection and hand woven knits creates the concept of Modern day, Little house on the prairie. Keeping her in mind, the focus of the design was based on the what her likes and personality reflected. She insists on wearing hand woven materials and coral colors. The display was inspired by the knitting techniques of handmade knits and geometric shapes of a quilt like pattern. By extruding the geometric shapes, this display takes on a sophisticated and delicate look.
