What is Performance Analytics?

Performance Analytics is a powerful SaaS and mobile-ready reporting and analytics solutions that provides insurance business managers ready-access to information and the insight necessary for optimal sales performance. Increase Operational productivity by leveraging dashboards, scorecards and easy-to-use on-demand reporting tools with VUE Performance Analytics. Track performance metrics to better understand factors impacting operational, financial, compliance and sales results for your organization.

Out of the Box
Performance Features

Configurable Dashboards

- Executive Sales Performance KPI's Dashboards
- Manage and evaluate goals based on KPI's
- Fully configurable dashboards
- Easy-to-use graphical interface
- Automatic alerts when measures move beyond customizable ranges

Drill-Down Reporting

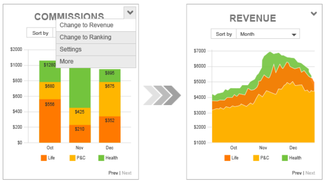
- Easily build and configure reports
- Powerful drill-down capabilities on all measures using SmartVUEs
- Personalized views; by product, organizational hierarchy, geography, along with many more dimensions

Fully Integrated

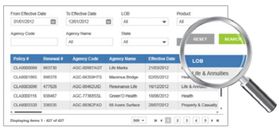
- Complete access to datasets for comprehensive analysis
- Analytical tools that empower business-users to perform their own analyses within the UI
- Export data to industry-standard tools for further analysis or presentation

Evaluate your performance with configurable dashboards

VUE Performance Analytics offers you out-of-the-box dashboards and more than 50 pre-built insurance focused reports needed to monitor sales and operational performance.



Drill-down reports with SmartVUEs



SmartVUE's can find anything, anytime, anywhere across your databases and visualize it real-time for total control. Results can be grouped, filtered, exported, printed, shared, and modified for deep drill-down analysis on-demand.

Smart, intuitive with a familiar user experience

No technical knowledge is necessary to run reports and gain insight into your business. Create your very own custom analytics dashboards with simple drag & drop features and configuration tools.

Consolidate your sources for a data-driven revenue strategy

Dimensional, flexible, modular and scalable enterprise-wide analytics architecture designed to consolidate your data for complete real-time control. VUE Integration manager can import data across multiple Databases, Text Files, Microsoft Excel®, XML, CSV, etc.
