

Full Coverage:

I took the tuxedo style bra and changed it up a little to make it different. There is a seam down the center of the cup for added look.

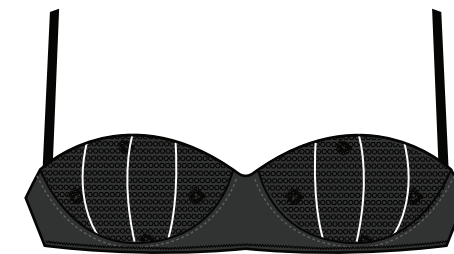

Minimizer:

The underlayer is the padding and wiring of a normal bra. The top layer is a lace that is gathered at the center on the bottom for style and then goes up to the shoulders covering more of the cleavage. The straps could be adjusted in the back.

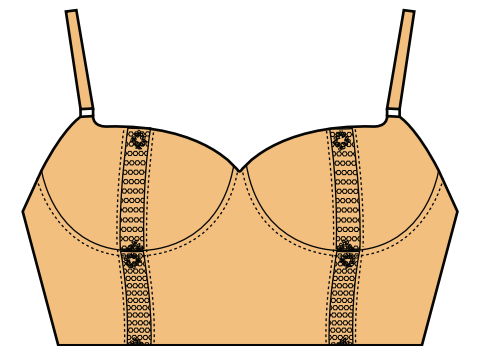

T-Shirt:

Because T-shirt bras are not suppose to have anything special to them, I figured the material would be what made this bra unique. Find a material that is soft and has a good pattern on it and it will be a good T-shirt bra.

Balcony:

The bra and lace overlay are black. Skinny white piping goes on the cups over the lace to give a pinstripe effect.

Long Line:

Along the princess line of the cups and torso there is a 1-1.5" wide strip of lace overlay for a slim effect. I would also recommend making this in a patterned material to make it even more unique and eye catching.
