

AQUA ROW AND THROW

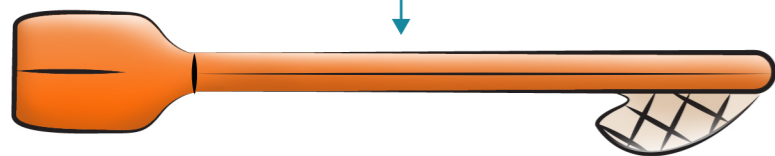

Aim: to score as many points as possible in a team by passing the ball between players in order to get it into one of three buckets on the opposing teams side of the pool.

Players: 6+

Teams: 2 [go head to head]

Duration: 30 minutes

RIM manufactured Polyurethane with HDPE netting glued in place

Each player uses the paddle net to pass the ball between players and move around the pool

Rope netting slots into noodle

Extruded pool noodle made of closed cell foam with a rope netting sealed in between

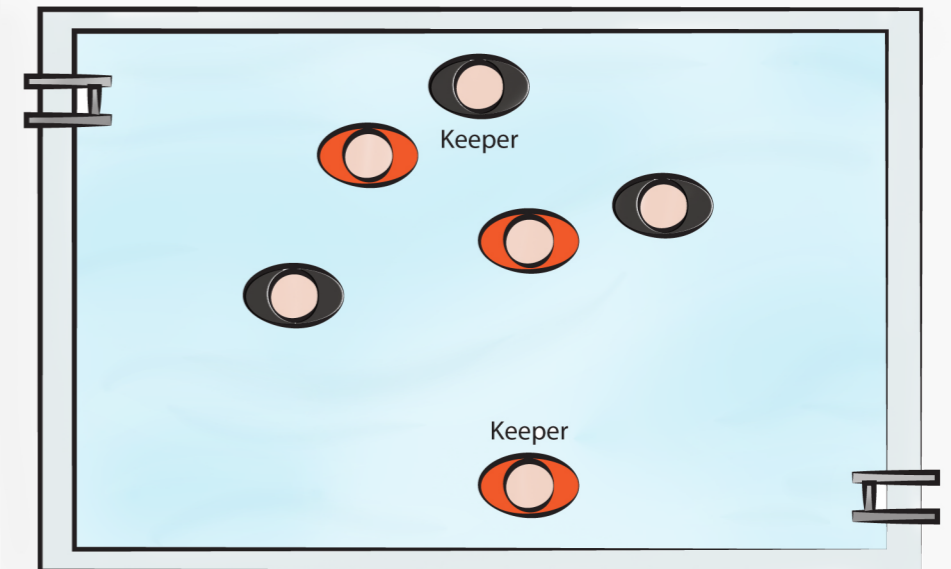

Each player uses a seated net to stay afloat

SKILLS: improves teamwork, social interaction, coordination and encourages focus on multiple tasks for a common goal

3 buckets: the larger the bucket the less points the team receive

One player acts as the 'keeper' to defend the goal from the opposing team

PVC inflatable beach ball
Rotation moulded PP buckets using existing tooling
