

The Carbon Medical CRMStriker™ is made from top of the line materials to assure a **water tight seal** and **virtually indestructible outer casing**. A trustworthy tool for any outdoor survival situation. When you venture into the unknown, you can always trust in your CRMStriker™ to get the job done.

The system of operation in using the CRMStriker™

## Fire Starter Concept

is as such: **Pop off the cap** to reveal the flint cylinder mounted upon a spring loaded contraption. continue to **press upon the touch points** near the top of the product as to provide contact between the inlaid wall of steel and the flint. **Project the flint cylinder into the ground** as to provide friction between the materials and create molten hot flakes of metal that launch out and contact tinder to create fire.
