

The CRM Canteen™ is designed with the avid outdoor enthusiast in mind. Its high impact polycarbonate exo-skeleton provides protection from the elements, while its carbon fiber inner shell provides even more stability and durability.

CRM Canteens™ built in water purifier filters water as you drink, using an ingenious replaceable carbon filter. When water passes through the filter, the carbon removes chlorine and organic contaminants that may otherwise harm the body.

All in all, this canteen stands above the rest because of its durability, resilience to the elements, and its ability to protect you from the dangers of the outdoors.
