

the wardrobe concept contains only side panel and shelving panel to reduce the waste of materials since any wardrobe fitting can be fitted either sideways or top hung.

The wardrobe unit with the frame structure, the side panels and the shelving panels.

The side panel connected to the steel frame with screws

elevation of the wardrobe unit

Type : open / closed carcass optional ; unisex

Materials : boards (Bison / Plywood)

The concept has three main parts, the frame (steel sections), the beams (side panels), the Shelf panel,

The steel section has holes drilled at regular interval for fixing the side panels on which the shelving panel rests on.
