

GATEWAY'S TECHNOLOGY OFFERINGS

As part of our partnership value proposition, Gateway Financial is happy to offer the following advanced technology to our advisors and team. We understand the value of business development and therefore offer state-of-the-art technology to maintain efficiency and increase productivity.

Avaya 9611G

The Avaya 9611G is designed to help our team and advisors be more productive and collaborative. Among various cutting-edge features, Gateway advisors are able to utilize a touch screen to speed the completion of common telephone tasks and take advantage of innovative features for conference calls and web access.

Meraki Z1

The Meraki Z1 is a firewall/WPN Gateway with five gigabit ethernet ports and a dual-radio 802.11n wireless that extends the power of networking to those working from home. Administrators can deploy network services including VoIP and remote desktop to remote employees with a single click, provide wired and wireless access, and increase Layer 7 traffic shaping.

Lenovo M72e

Save Time. Increase productivity. Designed to keep your business up and running, the entry-level M72e tower desktops deliver a host of PC-management tools and features that help IT personnel save time, cut costs, and increase user productivity. Includes simplified diagnostics dashboard, encryption technology and port disablement. Includes Windows 7 and dual monitor support.
