## Insight

- 1 in 7 people in the world have a disability, that's nearly 14% of our global population.
- 360 million have hearing loss and thus struggle to communicate and engage in day to day activities.
- My Grandparents have hearing difficulties and as a result struggle with balance and communication, so I would like to produce something to help alleviate the problems of hearing loss.

## Proposal

- Produce a product for people that have hearing loss, that will help aid their hearing and help them to communicate.

## Time Plan

## Skills Audit
