

TWIST

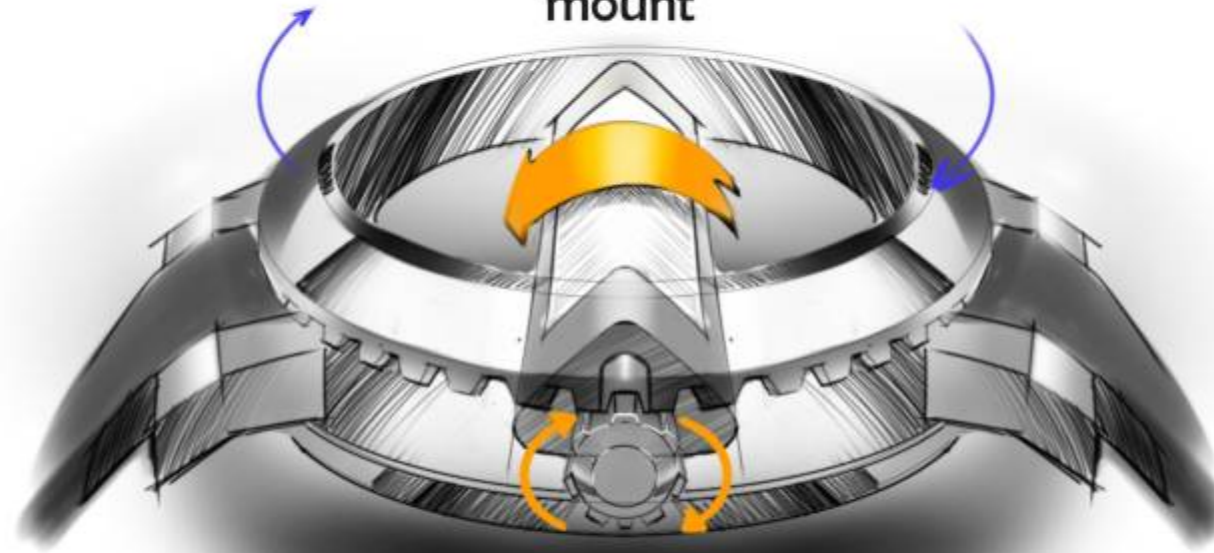

normal is boring..!!

in the first look , this concept looks simply COOL design , but with a twist of bezel , it PLAFULLY reveal the second time zone HIDDEN on the back of the barrel shaped case.

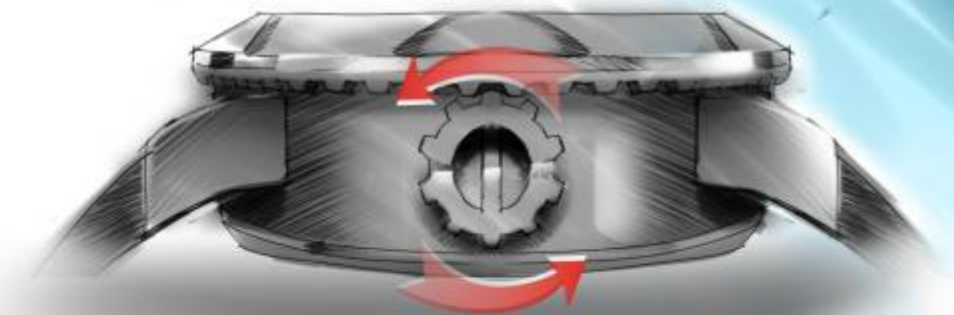

certainly a COVERSATION STARTER..

the inner barrel houses two different watch movements- one analog and second digital - the barrel takes full 360 degree rotation along with the attached gear wheel and displays the two faces simulataneously.

rotating central mount

gear wheel mechanism-

Design feature :

1. Rotating mechanism attached with bezel.
2. Inner unit rotates with gear mechanism.
3. Dual time display incorporated in central unit
