

# Indiegrow

independent **growing** systems

41% of Natural Disasters occur in South East Asia

One in nine of the worlds population goes to bed hungry

1.5bn children are blind in South East Asia due to lack of Vitamin A

**Indiegrow** is a farming alternative that utilises local materials in South East Asia and conserves precious water through combining a water capture system, a recyclable water supply and coconut coir, a very absorbent growing media.
