

**M1100 SERIES HMMWV****M1167**

PERFORMANCE — The M1167 is an Expanded Capacity Vehicle TOW/Armament Carrier HMMWV. Along with the TOW missile launcher, the M1167 provides for the ring-mounting and firing of various weapons systems with a 360 degree arc of fire. The M1167 is able to stow a minimum of six missiles mounted in the cargo area and is available with a Manual Traversing Unit and a TOW Gunners Protection Kit.

PAYLOAD — As an Expanded Capacity Vehicle, the M1167 is specifically designed for use over all types of roads, as well as cross-country terrain, and in all weather conditions without sacrificing mobility, dependability or performance. The M1167 is air transportable and droppable, and can be sling-loaded by helicopter.

PROTECTION — The M1167 provides superior protection for crew, weapons components, and ammunition. The armor is available in two kits: The “A” kit, which can be factory installed, and optional “B” kit, which when combined, provide gapless mine and ballistic protection. The additional armor and fragmentation kits are field installable and removable to provide flexibility for missions that do not require heavy protection. The vehicles are equipped with an A/C system to provide greater crew comfort.
