

EARTHLY ESSENTIALS

- Prints and patterns are inspired by nature, created by hand or digitally.
- Colors are muted, sun bleached and over washed with imperfect patterns.
- Streaked earth tones, pale peach, verdant green, golden yellow and soft pink complete the mood.
- Meadow and wild flower patterns are scattered in intricate embroidery or floral scenes.
- Textile prints represent the earth's ability to become marbled and fractured over time. Hints of mineral influences become integral to the patterns.
