

Fusion is a multi-culture design based consultancy aiming to 'Fuse cultures together.' The center that I have designed is a theatre and arts center that everyone can enjoy and use. It is for all age groups, couples, families and pensioners of all sex, race and nationality. My space is also wheelchair friendly with access throughout.

My center will include display and exhibition areas on both floors and also separate, private areas for users to interact in different activities of their own choice. My ground floor will be openplan allowing for users to work, play and enjoy in a spacious, relaxed environment. A restaurant/cafe, a coffee kiosk and a gift shop will also be available for users both of the center and from the local community to use.
