

Lauren L

-used to have two week contacts but she would never take them out and she got a cyst in her eye

-now has 30 day/night ones that she doesn't have to take out

-doesn't really have a problem with dropping them

-has a hard time seeing the contacts

-prescription is -6 in both eyes

-never cleans the contacts when she takes them out of her eye, just lets them soak

-hasn't replaced case in 1 year

LAUREN TAKING CONTACTS OUT OF EYES – 45 SEC

0-20 sec.	20	filling contact case with solution
20-26 sec.	6	takes right contact out of eye
26-27 sec.	1	puts contact into case... moves VERY close to case
27-33 sec.	6	takes left contact out
33- 35 sec.	2	puts contact into case... moves VERY close to case
35-41 sec	6	screws on lids
41-42 sec	1	drops left lid
42-45 sec	3	screws on lid

ISSUES –

takes a long time to fill contact case

has to move really close to see contacts to put them in the case

takes a long time to use screw top lids

drops lid – clumsy

got a cyst due to not taking care of her eyes

never cleans the contacts now, just lets them soak

doesn't wash her hands
