

# INCLUSIVE ECO-GARDEN PRODUCT: INITIAL CONCEPTS AND RESEARCH

Further research

Give people with no gardens the opportunity  
 → Children from built up areas need to learn about nature  
 Often find people no longer garden due to decreased mobility which is unfair as it's often a soothing and relaxing activity which should be enjoyed by all.

Space - Is there a way to stack pots  
 - hanging pots - upside down plants

Garden Center Research

lots of bending over  
 kneeling - Pools needed

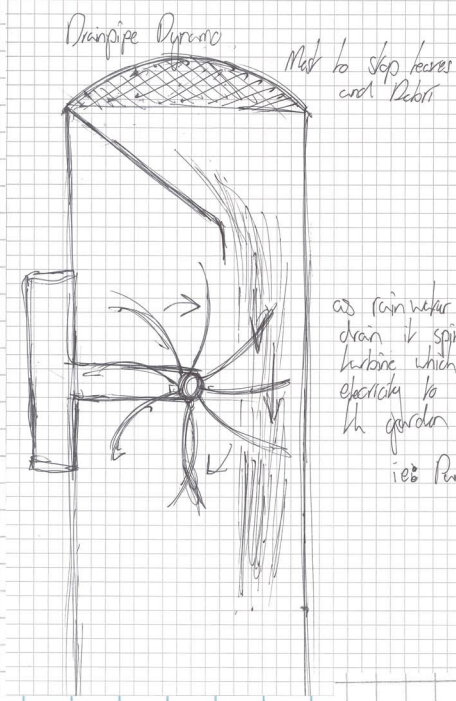

Is there a way to raise the flower beds?

## USER PROFILES

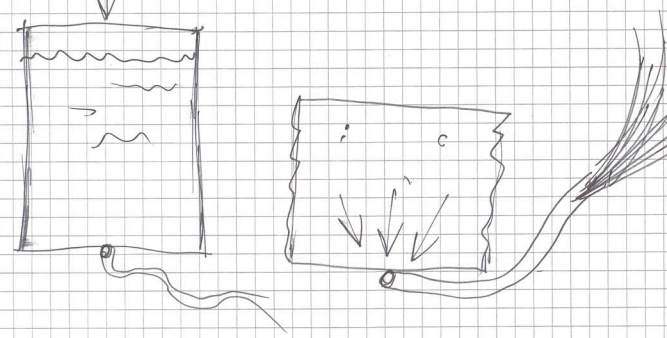

- \* NIBERT SIMPSON ex GARDENER (HOBBIST)
- \* LUKA WAGH nature project coordinator
- \* Simon Dean gardener

Short Questionnaire for Grandparents

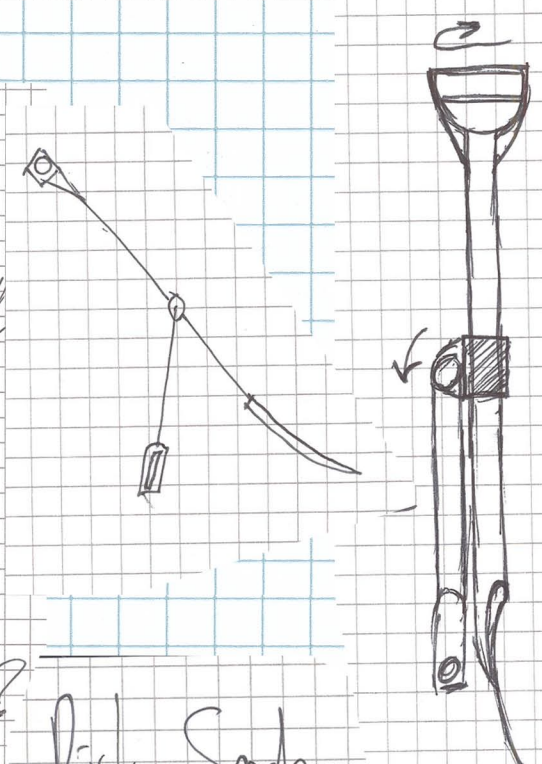

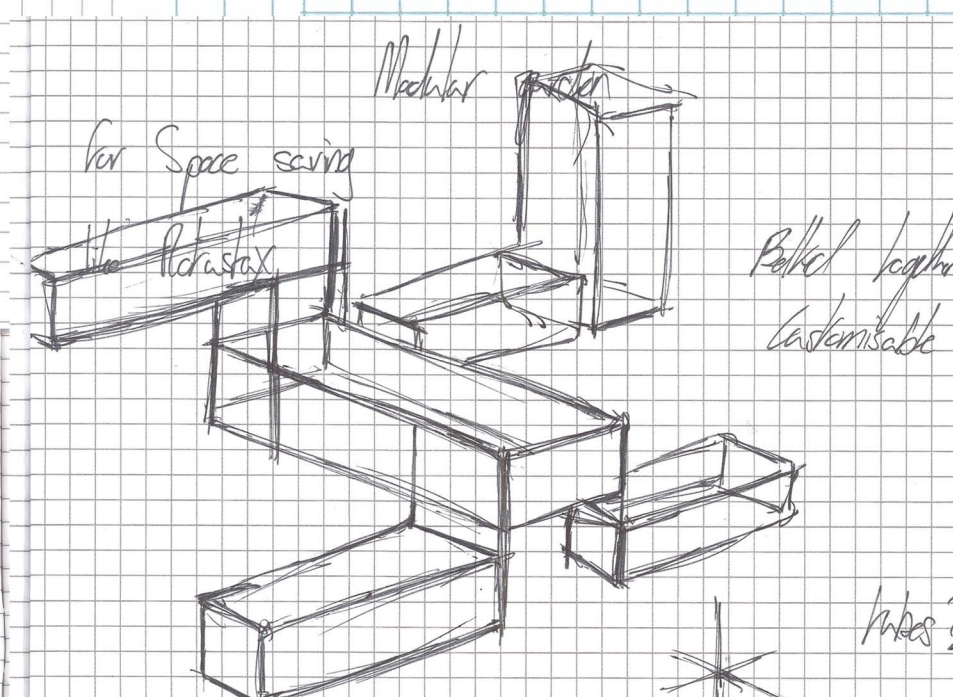

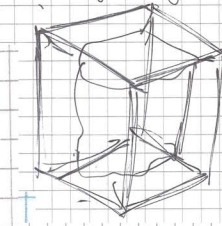

1. Do you still do alot of Gardening? Y/N
2. Why do you not do as much as you used to?
3. How long does it take before you need a rest?
4. What is the reason for this
5. What sort of Gardening do you do? Allotment/Home/Research
6. If Allotment - a Where does your power come from if any?  
 b Where does your water come from?  
 c What is the security like in your allotment?
7. Would you use specialised tools for Sowing & watering?
8. How do you dispose of garden waste?

USE BARRIL IDEA - Collapsible which would allow the pumping of water around the garden without power

Use one with but ideally use frame with and water highly local

Garden Irrigator - for longer gardens and allowing

- Use the energy generated from the burning of material to generate power
- Research into the use of the charcoal/Asst for catalytic
- Means transport of waste is minimum as it is disposed of on site
- Gets rid of the need for hoses ect
- Could also be used as BSC - powering outdoor lighting/Speakers
