Functioning as **Coastal Resources Management, LLC**, the joint venture is comprised of CDM, Waggoner Engineering, Inc., and Thompson Engineering.

Founded more than 60 years ago, CDM is a consulting, engineering, construction, and operations firm that ranks among the world's premier organizations dedicated to improving the environment, health, and infrastructure in partnership with public and private clients. With a multi-disciplinary staff of about 4,300, the firm's full range of comprehensive services includes architectural and engineering design, environmental management and planning, transportation, management consulting, information management, and construction. Projects range from small, short-term solutions to complex, ongoing environmental and infrastructure management programs.

Waggoner Engineering, Inc. has served public agencies and private corporations across the southeastern United States for the past 33 years. Waggoner has helped clients discover and develop innovative infrastructure solutions in the fields of civil engineering,

transportation, environmental, water resources, land development, flood control, surveying, program management, digital mapping, and economic development. Blending unique expertise and robust capabilities, Waggoner provides clients with exceptional engineering and planning services to create economic opportunities, improve communities, and enhance quality of life.

Established in 1953, Thompson Engineering is a full-service engineering, environmental, and construction management firm with eight offices located throughout the southeastern United States. Thompson has over 300 multi-disciplined personnel providing civil, structural, geotechnical, mechanical, and electrical engineering; transportation engineering; drilling; surveying; environmental consulting; stormwater management; construction engineering inspections; construction materials testing; and roofing and building envelope consulting services. Thompson Engineering is a member of the U.S. Green Building Council and has six LEED accredited professionals on staff.
